

# Voidy – the safety decking for hatches

Rapid protection to prevent a fall down a hatchway

## Innovative design that Prevents falls into hatchways

The Voidy hatch safety deck forms a temporary grill to prevent falls down the hatchway whilst providing a robust safe working platform

- Avoids need for rails or barrier around hatch
- Makes a strong and robust work platform
- Helps meet HSE safety requirements
- Quick to install; easy to fix in place

*Picture (left) shows hatchway covered, trellis fixed, locked off, and safe for work to take place in the attic*

### A safety work platform:

- Compact unit; quick to move into attic
- Easy to fix in place
- Makes a strong platform
- Locks in safe position
- Helps meet HSE safety standards & improves efficiency of work

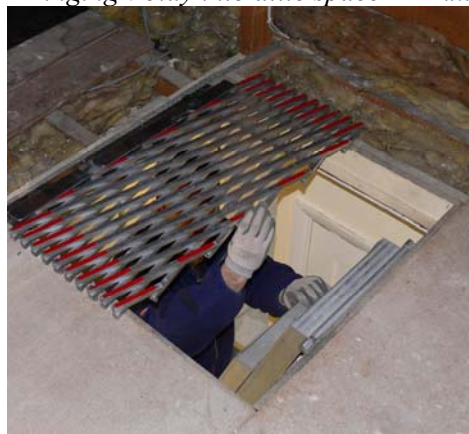

*Bringing Voidy into attic space*

*Fixing edge to frame of hatchway*

### A hatch cover with easy access:

- Easily fixed in place to prevent deck skidding out of position when in use
- Trellis slides open for easy access
- Trellis platform hinges up to provide full access for materials, etc

*Trellis slides open for quick access*

*Platform hinges up for full access*

*The concept and design is protected by patents and patent applications for UK and other countries*
