

BIG PLANS TO SAVE WATER AND MONEY

NEW FROM PHS WASHROOMS' AWARD-WINNING DESIGN TEAM

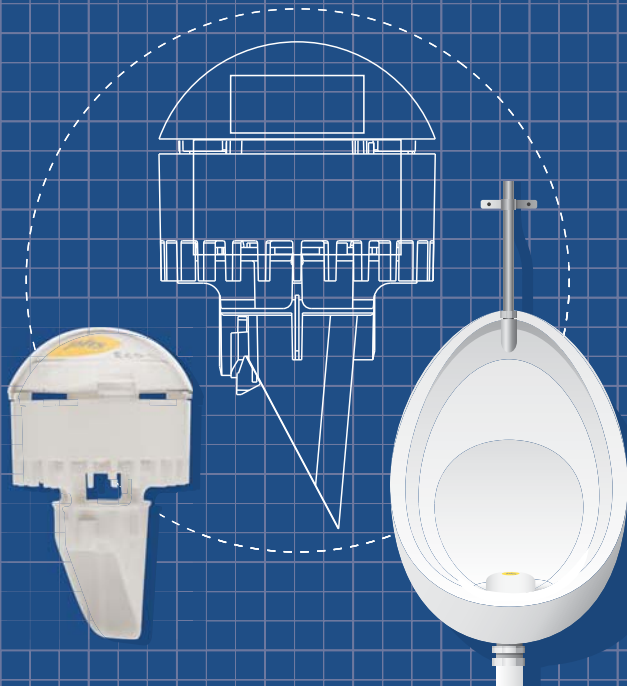

FLOW-SAVER™

- New intelligent water management system proven to save up to 96% of water*
- Real time clock enables flush scheduling to maximise water savings
- Infra-red detection regulates flushing for total efficiency

* Compared to an uncontrolled cistern. Flow-saver can save up to 30% more than basic water management systems

AWARD-WINNING
PRODUCTS

ECO-SHIELD™

- Improved urinal sleeve that saves time, water and money and combats smells and blockages
- Incorporates **two** odour-beating blocks: Red Berry fragrance block and Nurazyme™ bio-block - breaks down uric salt and limescale using natural enzymes and friendly bacteria
- The only urinal sleeve to feature a unique one-way odour trapping 'shield'
- Use in conjunction with Flow-saver to minimise water use while maintaining washroom freshness

PHS WASHROOMS URINAL SERVICES COMPLETE CARE FOR URINALS

FLOW-SAVER™ WATER MANAGEMENT SYSTEM

An innovative water saving device that prevents unnecessary urinal flushing when washrooms are empty, and minimises flushing when they are in use. A real time clock coupled with infra-red technology maximises savings without compromising hygiene. Flow-saver is an award-winning intelligent water management system that can save up to 96%* of water, reducing expenditure and minimising impact on the environment.

ECO-SHIELD™ URINAL SLEEVE

The award-winning Eco-shield is exclusive to PHS Washrooms and will help to eliminate urinal smells and blockages. It uses the unique combination of a separate fragrance block in addition to a bio-block and the latest in urinal sleeve technology. Eco-shield breaks down uric acid and limescale using natural enzymes and friendly bacteria. With no need for harmful cleaning chemicals, urinal blocks, or constant flushing, it also helps to conserve water.

AUTOSAN CISTERN SANITISER

PHS Washrooms' cistern sanitising system deodorises and destroys bacteria in urinals and toilets, helping to keep washrooms clean, hygienic and smelling fresh. A measured dose of fluid, proven to be effective against E.coli and E.faecalis, is automatically injected into the cistern. This sanitising fluid also helps inhibit the build-up of scale in the pipework.

MICRAKLEEN

A highly effective natural biological cleaner, Micrakleen will not damage friendly bacteria like some harsh chemicals can, so will not limit the effectiveness of Eco-shield's bio-block. Micrakleen is an environmentally friendly cleaner that does not contain harmful irritants and can be used across the washroom.

* Compared to an uncontrolled cistern. Flow-saver can save up to 30% more than basic water management systems
