

PHS Washrooms goes a little bit further by providing you with extra features unique to us:

Water & Energy Saver Range

The award-winning Water and Energy Saver Range not only guarantees hygiene in the washroom, but also helps you meet sustainability targets by saving water, energy, and money.

Exclusive to PHS, this range brings together our innovative and environmentally friendly water saving products, Flow-saver, Flush-wiser, Eco-shield and Adapta Tap, together with our low energy hand dryers, Airforce and SMARTdri.

Black & Chrome Range

The Black and Chrome Range is an exclusive selection of washroom products available in high quality polished and brushed chrome finishes.

Designed to complement any modern or luxury washroom, the range brings together products for all areas including hand dryers, paper dispensers, soap dispensers, sanitary disposal units, vending machines, aircare units, cistern sanitisers and water management systems. The range also incorporates a unique Black Airforce high speed, low energy hand dryer.

24/7 Priority

24-7 Priority is a unique emergency service offered to all PHS Washrooms UK customers.

PHS Washrooms will carry out a free emergency service or repair by the next working day on all non-electrical items (working days are Monday-Saturday). For electrical items we aim to get to the customer within three days, or sooner wherever possible. This service helps customers with any unforeseen emergency or unexpected high visitor numbers. Helping our customers look after their staff, visitors and customers.

SteriTouch®

SteriTouch antibacterial surface protection is incorporated into a range of products to give your washroom the highest level of hygiene protection.

Exclusive to PHS, SteriTouch uses innovative and patented antibacterial technology that harnesses the natural sterilising properties of silver. Proven to protect against cross-infection and dramatically reduce the spread of germs such as MRSA, E.coli and Salmonella, SteriTouch won't wear off over time.

Envirosan® Active

Envirosan Active is a powerful, natural germicide spray that is exclusive to PHS and designed specifically for our pedal and automatically operated sanitary disposal units.

It tackles bad smells and odours, reduces environmental impact and powerfully protects against potentially harmful bacterial, moulds and viruses, reducing bacterial levels by 99.99%. It is also certified against HIV, Hepatitis B and Hepatitis C and conforms with BS1276 and BS13727.

Odouraze™

Odouraze odour neutraliser is incorporated into the fragrances of PHS Airscent Burst, Airscent Breeze and Air-o-matic air fragrance and odour neutralising units.

Odouraze uses unique 'malodour control technology' which features active ingredients that interact with malodour molecules to destroy bad smells, rather than just masking them. This ensures that your washrooms and communal areas will always smell fresh and odour free.

Many of our products have been recognised with accreditations and awards:

Water Regulations Advisory Scheme

WRAS assesses water fitting products to ensure that they do not waste, misuse, unduly consume or contaminate the water supply, in order to show compliance with Regulation 2 of the requirements of Water Supply (Water Fittings) Regulations 1999.

WRAS approved products are Flush-wiser and Adapta Tap.

Water Technology List

This is a list of products that have been approved by DEFRA for their water saving technologies. Businesses are able to claim 100% first year capital allowance on investment in products on this list.

Flush-wiser is on the Water Technology List.

Waterwise Marque

This marque is awarded to products which reduce water wastage or raise awareness of water efficiency. Waterwise Marques can be awarded across a broad spectrum of products.

Waterwise Marque products are Flush-wiser, Flow-saver and Eco-shield.

British Institute of Facilities Management (BIFM)

BIFM is the home of facilities management in the UK. The institute provides information, education, training and networking services for over 12,000 members, both individual professionals and organisations.

Flush-wiser was awarded the BIFM 'Innovation (New Product)' Award 2008.
