

CLINICAL WASTE

In an increasingly legislated environment, the storage, handling and disposal of healthcare waste is becoming a complex task for many organisations. At PHS Wastemanagement, we recognise that you need a supplier who offers you simple and cost-effective solutions to deal with all forms of healthcare waste.

We pride ourselves on providing a tailored solution to meet the complex needs of the healthcare community, including high street pharmacies, hospitals, doctors, care homes and at-home care. Our focus on providing community services means that we are able to collect a wide range of waste streams from small sites as well as high volume collections.

Whatever waste stream we are dealing with, we understand that as a waste producer you have a legal responsibility to show that you have dealt with your waste appropriately and can demonstrate that you have fulfilled your "Duty of Care" under the Environmental Protection Act 1990.

With many forms of healthcare waste also being covered by the Hazardous Waste (England and Wales) Regulations 2005*, the need to be able to provide evidence of appropriate disposal is further emphasised. For this reason, we will provide you with a full audit trail so you can be confident that your waste is handled correctly.

We have a team of experts on hand to advise you on all areas of waste legislation, "Best practice" and what actions you need to take to ensure you are fully compliant. Not only that, we can customise a solution to your individual requirements so that the service you receive is the most effective and efficient for you, as well as the environment.

* Special Waste Amendment (Scotland) Regulations 2004 and Hazardous Waste Regulations (Northern Ireland) 2005.

COST EFFECTIVE DISPOSAL SOLUTIONS

All of our disposal routes are fully audited and use best available technology to ensure that your waste is safely disposed of in a way that seeks to limit the environmental impact.

Our specialist services include:

Infectious Clinical Waste Collection & Disposal

Our services are suitable for all types and volumes of hazardous waste such as sharps, swabs or dressings contaminated with blood or infectious substances.

Offensive Waste Collection & Disposal

This service offers a cost effective disposal solution for non hazardous wastes such as nappies, colostomy bags, empty urine bottles and other wastes which are classed as offensive.

Hazardous Waste Collection & Disposal

Our comprehensive service includes the collection and disposal of all hazardous wastes.

Supplier of Specialist Waste Containers:

- Sharps Bins
- Disposal Stands & Bags
- Spillage Kits
- Ecoloc Airtight Rigid Containers
