

Folding Display

59271/RB

Busyfold® heavy duty display systems

The ultimate folding display system

Aluminium framing, interlocking gear hinge mechanism and a secure panel locking system make this a superb, robust and safe system. The upper set of panels lock securely onto the lower set, preventing them from toppling over, even when repositioning the display. The interlocking hinge prevents daylight showing between the panels. The rigid double sided panels are a generous 700 x 1000mm and are available in a choice of 8 loop nylon finishes. A wide range of accessories are available including linked headers for easy assembly. The 7 panel unit is supplied with a triangular shelf.

TO ORDER:

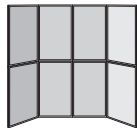

Please state the product code followed by the loop nylon fabric colour code required
EXAMPLE: Busyfold HD 8 panel in royal blue = **59271/RB**

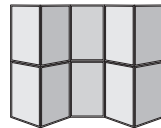

Panels 6
Size H 2000mm
