Think Foam. Think...

Polyformes

Foam specialists

Inserts | Shapes | Sheets

Polyformes has made unparalleled investments in technical staff, training and machinery to specifically convert flexible pe foam materials. This is why we are so successful at being able to supply all foam products to every industry sector.

We specialise in bespoke foam parts in any volume, high or low, and any size, small or large. There is very little that we cannot make out of closed-cell expanded polyethylene foam with our experience. Intricate or easy – we can make it and in the quantities you require. Automatic machinery allows for high volumes, and traditional equipment allows for smaller quantity units.

ISO 9001 accredited and utilising LEAN manufacturing techniques and Six Sigma project management, not only do we have the training, but also the systems in place to ensure reliability, quality and delivery.

PSP Performance
SOLUTION PACKAGING

Packaging specialists

Transit | Export | On-site

PSP is one of the UK's most experienced manufacturers and suppliers of timber crates, plywood cases, corrugated cardboard boxes, solidboard boxes, flight cases and bespoke pallets and skids.

We design and package equipment for the UK's defence and aerospace industries, amongst others, ensuring goods are safely protected for UK or global transit and shipment. Export and storage packaging for any size equipment can be undertaken on our premises or at your own site. Whether for machinery, heavy engineering apparatus or dangerous goods – we have the expertise in secure handling.
