

Type HIJD Insulation Jacket

- Teflon Polyester jacket
- Thermal Insulation
- Flap for Filler Access
- Can be used with HSSD, HISD or HBD
- Standard sizes 25L, 50L, 105L, 200L
- Bespoke Sizes Made to Order
- Water Resistant
- Easy Installation
- Ex-stock

Type HIJD Insulation Jacket

Advantages:

The HIJD Jacket provides a cost effective method of minimising heat loss and therefore extending the process temperature of the product.

When used in conjunction with the heated base unit (model type HBD) heating times are quicker and therefore reduce energy costs. The HIJD jacket can be fitted after heating whether it be by using a silicone side heater, insulated heating jacket, or when removed from an oven preventing/reducing temperature loss that has cost money to heat.

The use of a jacket will help against other environmental effects such as wind chill, frost and cold conditions.

Construction:

High performance ceramic fibre thermal insulation contained within layers of Teflon coated polyester give the jacket a durable and industrial feel.

Easy to fit with Velcro fixing strips and a moveable flap for ease of access makes the HIJD jacket the most convenient way to keep your products warm.

Technical Data:

Jacket Material: 1100 deitex texturised Nylon
Polyurethane coated

Insulation: Glass filament blanket

Fixing: Velcro Fixing

Custom Made:

A wide range of sizes can be manufactured to customer requirement, Holroyd can supply insulation jackets to cover all sizes of drums and containers.

Health & Safety:

All HIJD heater jackets are manufactured to conform to the EEC low voltage and EMC directives and CE marked accordingly.

Customer Support:

Established in 1972 Holroyd have been providing surface heating solutions for customer requirements throughout the world. As Europe's largest specialised silicone rubber heater manufacturer our experience and product range is vast.
