

Soft Surfaces

SPORTS AND SAFETY SURFACES

Artificial Grass

Artificial grass has quickly become all the rage in the UK in gardens, play areas, golf courses and sports fields. This is due to the technical advances made in the performances of the grass which gives the surfacing a true feel to it being natural grass but with all the added bonuses of looking great all year round, no cutting of the grass, watering or maintenance.

Artificial grass provides a superior flooring solution for a variety of applications. You will know of synthetic grass in the sports industry (made famous by astro turf) but consider how it can be applied in other areas. Artificial grass is now popular for residential garden lawns, decking, dog runs, safety flooring, corporate events, play area and school playground flooring.
