

# Soft Surfaces

SPORTS AND SAFETY SURFACES

## Javelin Run Up

Javelin Run Up are constructed 30m in length by 4m width if it is to meet UK athletics or IAAF standards.

The javelin run up is surfaced in the same material as the running track and white lines should be installed to surface to create a throwing arc.

The javelin surfacing is commonly known as [tartan surfacing](#), polymeric surfacing or sprayed EPDM rubber surfacing.

If installed for recreational use within a school or similar then we can tailor the size, specification and surfacing to fit within any budget or personal preference. Javelin run up can usually be used for long jump runway and [triple jump runway](#).

## JAVELIN RUN UP

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
