

## Multi Tufted Surfacing

Artificial grass has quickly become all the rage in the UK in gardens, play areas, golf courses and sports fields. This is due to the technical advances made in the performances of the grass which gives the [synthetic turf](#) surfacing a true feel to it being natural grass but with all the added bonuses of looking great all year round, no cutting of the grass, watering or maintenance.

The 'Multi Tufted' surface is a heavyweight closely tufted pile surface ideal for heavy use [sports surfaces](#), walkways and patios.

With the yarns being closely tufted there is no need for a sand infill as the fibrillated polypropylene fibres are strong enough to withstand the properties normal infill turf can hold.

Installation can be loose lay, spot adhere or glue to any solid sub base.

## MULTI TUFTED SURFACING
