

# Soft Surfaces

SPORTS AND SAFETY SURFACES

## Polymeric Surface

A **Type 3 MUGA** and **Type 4 MUGA** both are finished polymeric surfaces.

**Type 3 MUGA** is a [polymeric surface](#) that consists of a 9mm depth SBR base course shockpad which then has a 3mm spray applied EPDM wearing course with binder and anti slip properties to meet the slip resistance of TRRL 75 which is primarily used for netball.

**Type 4 MUGA** is a polymeric system that consists of a 12-15mm depth [EPDM](#) wearing course (1-4mm rubber granule), mixed with a polyurethane resin binder. The primary sports is football & basketball and the anti slip resistance needed to be met is TRRL 55.

Demarcation can be made utilising different colours or line marking. The different colours can be applied with the application of the anti slip paint and these come in a selection of colours with red and green being the standard range.

## POLYMERIC SURFACE
