## PREMIUM BONDED RUBBER MULCH

### PREMIUM Resin Bound Rubber Mulch

This is made from 100% recycled tyre rubber shred, which is then colour coated using our industry leading process.

#### Bonded Rubber Mulch

Our Premium Bonded Rubber Mulch which should not be confused or compared to standard rubber mulch systems that are widely offer, often at cheap rates. As with most things in life, you generally get what you pay for.

The system we offer is the only system to be developed solely as a bonded surface, and not just rubber mixed with any type of binder which can give variable results.

Our binder has been carefully formulated to work specifically with our tightly controlled blend of shred, this of course is unique within the bonded mulch market.

All components are manufactured together to work together, with a commitment to ongoing technical advancements.

100% recycled rubber.

Please check site suitability of this product prior installation as we do not recommend its use in all applications. We advise a dynamic sub base and edges in all applications where budgets and site condition permit, but it can be laid over most existing surfaces.

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
