

## COMPETITION TAKE OFF BOARD - LONG JUMP

### Recessed Take-off Boards for Long Jump & Triple Jump

Our recessed competition take-off boards are the ideal solution where a higher standard of take-off board is required. These are also popular where the [polymeric long jump runway](#) is used for both triple jump as well as traditional long jump. These boards come in component form.

- Foundation Trough
- Fixed Blanking board
- Removable take off board including no-jump indicator and replacement take off board
- Lifting hooks

The foundation trough (1220 x 355) can be set into the long jump or [triple jump runway surface](#) or foundation during the [long jump construction](#) process. The insert option(s) have adjustable legs to ensure an exact fit. All the main components have a galvanised finish.

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
