

Spectator Rail

Spectator rail fence is generally 1m - 1.2m high fencing that can be a simple rail and post system or have infill mesh.

The rail and post system is the cheapest option which is generally a top rail spectator barrier that can have chicane type entrances or can have double leaf gates and single leaf gates.

The more popular option is to have the [spectator rail](#) with a mesh panel that can act as a ball stop barrier and this can also have kickboards attached if necessary. Gates are installed with this type of fence to make sure there's ball stop facility totally surrounding the [ball court](#) area.

SPECTATOR RAIL

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
