

Soft Surfaces

SPORTS AND SAFETY SURFACES

SSNBR GRADE for SPECIAL APPLICATIONS

SSNBR

Soft Surfaces has developed and tested various permutations of the traditional wetpour system, tailoring to meet the specific requirements for certain projects. This is one of our success stories.

Whilst SSNBR is only available in Black and has the same appearance as traditional wetpour.

Our in house tests have shown the SSNBR to have the below results over black EPDM :-

- Over 50% Greater Tensile Strength
- Over 100% Greater Ultimate Elongation

This results in the surface being stronger and more resilient to puncturing. Specialist applications include: Golf pathways ; Sports Pitches ; Horse Walkways ; High Use Play Equipment

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
