SPORTS AND SAFETY SURFACES

## Timber Kickboards

The rebound [timber kickboards](#) are usually installed to the bottom of sports fencing on the majority of MUGA ball courts and sports pitches constructed. Especially where hockey is played because the kickboards is a true rebound finish and protects the fencing installed.

In general timber kickboards will not last the lifespan of the fence and therefore may be needed as part of the [sports pitch renovation](#) which could be as simple as sanding down and re-painting the kickboards, to give it a weathered protection coating or replacing them in damaged areas.

The timber kickboards are installed to chain link fences, spectator rails, sports rebound systems, goal recess areas, single leaf gates and double leaf gates.

## TIMBER KICKBOARDS

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
