

Triple Jump Runway

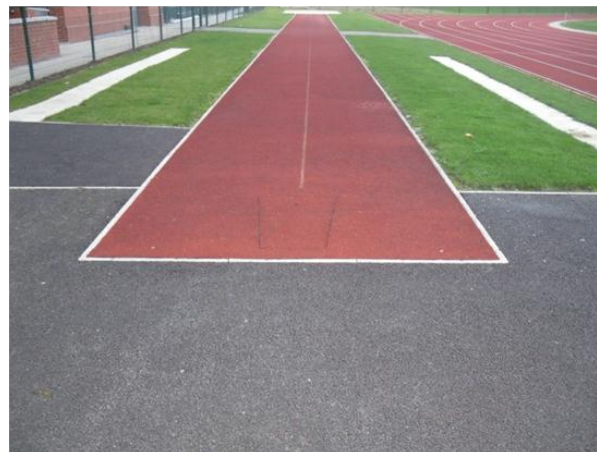

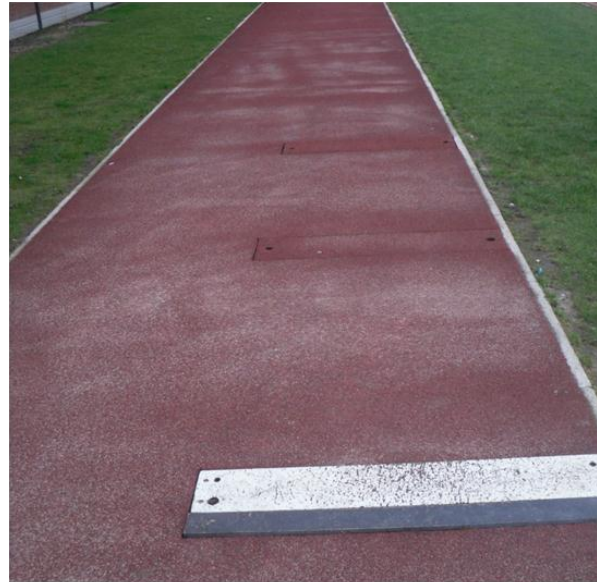

Triple Jump Runways are all the rage in schools and colleges. They are relatively easy to construct and can fit within most budgets.

The construction of the triple jump runway is an engineered sub base with a coloured [polymeric surface](#) which is to have removable take off boards or simple line marking if budget is low.

The landing pit has got to be filled with washed and rounded sand and to be filled within a perimeter edge.

The benefits of the [triple jump runway](#) are that they are pretty much maintenance free and can be constructed to any size to fit the customer budget.

TRIPLE JUMP RUNWAY

Water House, 35 Water Lane, Wilmslow, Cheshire, SK9 5AR
