The International Group

Beck & Pollitzer is one of Europe's leading engineering services companies specialising in the installation and relocation of all types of industrial machinery, plant and associated services.

The company operates from 16 international locations and can offer a complete turnkey service both locally in each of its operating countries and internationally from its vast and experienced resource base.

- **International network of operating centres**
- **Highly skilled and experienced teams**
- **Comprehensive list of resources**
- **Professional service**
- **Modern European company with a long history and first class track record**

History and Growth of the Company

From its conception in London, England in 1863 the Company has continued to grow in both operating locations and in the people and skills necessary to offer its customers the highest possible service.

The Company's 140 years of experience has been expanded across its Central & Eastern European network.

More recently Beck & Pollitzer has opened operating bases in both Russia and Turkey and its policy of expansion to meet the needs of its growing international customer base continues.

Beck & Pollitzer is proud to be able to offer the same level of high quality services in all of its operating centres.

Engineering Services

Beck & Pollitzer - Innovative, flexible and cost conscious engineering services with a proven record of excellence and reliability.

We provide customers with a customised and quality assured service ranging from a single machine move to a complete factory installation.

The Beck & Pollitzer service includes -

- **Project Management**
- **Specialist Engineering Services**
- **Machinery Installation and Relocation**
- **Mechanical, Electrical, and Maintenance Services**
- **Control Systems**
- **Transport Division**
- **Export Services**
- **Plant & Crane Hire**

Resources

Utilising the latest technology to provide a quality and safe lifting and installation service the company is continually investing in the resources needed to support our constantly expanding international market.

People

- Highly trained personnel
- Project managers
- Engineering staff
- Installation & relocation staff
- In-house supervision and labour
- Specialist in many industrial sectors

Equipment

- Specialist gantries
- Heavy lifting equipment
- Lifting tackle
- Engineering resources
- Alignment and leveling
- Fork truck fleet
- Heavy transport
- Mobile cranes

Project Management

Beck and Pollitzer has an unrivalled reputation of professional project management services. The management of large complex machinery installation and relocation projects is an integral part of the services offered to clients.

From total turnkey installation projects in which all of the company's services are combined to the complex relocation projects inclusive of lifting, transportation & shipping requirements and of course ultimately the re-installation at destination.

- Design & Planning
- Risk assessment and H&S compliance management
- Programming & scheduling
- Resource planning – labour management
- Client liaison

Machine Installation & Relocation

From single machine moves and installations to complete production lines and process systems and including complete factory fit-outs of the support services.

The core of Beck and Pollitzer's business is the movement and installation of machinery of all types and from all industrial sectors.

- Single machine moves
- New equipment installations
- International relocations
- Heavy lifting
- All skilled labour & resources
- Internal relocations
- Factory removals
- Secondary services
- Transport and storage

Electrical and Mechanical Services

In conjunction with its machinery installation services Beck & Pollitzer will undertake the supply and installation of all support services for the machinery and plant being installed or relocated.

- **Electrical Services –**
total service for all electrical services from de-commissioning to reinstallation & testing of electrical power & control supply.
- **Mechanical Services –**
Pipework design, supply and installation services in support of the core machinery installation services.
- **Steelwork & extraction systems –**
Design, fabrication of steelwork structures, access platforms and extraction ductwork systems.
- **Extending the Service –**
in-house capability in machine tool support, control systems and maintenance services have allowed Beck & Pollitzer to extend the scope and level of service within the mechanical and electrical divisions; alignment, accuracy checks, fault finding, commissioning & maintenance.

Control Systems & Maintenance

Beck & Pollitzer provides certain clients with a maintenance and aftercare service for plant, equipment and machinery.

The company can provide a range of high calibre engineering professionals from alignment & installation specialists to maintenance & commissioning engineers.

Beck & Pollitzer Control Systems specialises in the oil and gas sectors and has long term contracts for design and installation as well as maintenance projects for key clients in these highly skilled environments.

- **Maintenance and support**
- **Control Systems division**
- **Alignment and levelling**
- **On-going site support**

Support Services

The company has always had integrated craneage, transport and plant hire departments within the business.

The specialist plant hire division has been extended to our European divisions to ensure we support the transfer and installation of machinery with the best possible equipment and resources.

- Crane Hire
- Transport Services
- Plant Hire specialist fork lift trucks
- Heavy lifting gantries and equipment
- Packaging and shipping
- Export services

Health & Safety

The safety of all of our people, and that of all others connected to our work, is of first importance at all times.

The Company continually strives to improve the safety standards through training, education and continuous improvement.

- In-house safety personnel & training for all staff
- Safe systems of work to ensure compliance with both National and International standards and regulations
- Close working relationships with customers
- Standardised systems throughout the business

Quality

The Company has achieved BS:EN ISO 9001:2000 quality accreditation and has standard operating procedures throughout the Group.

- The Company ensures that the highest quality procedures are engaged in all of its operations to provide the best possible service to our customers
- Constant review and improvement systems are in place and quality systems and methods are engaged at all levels of management

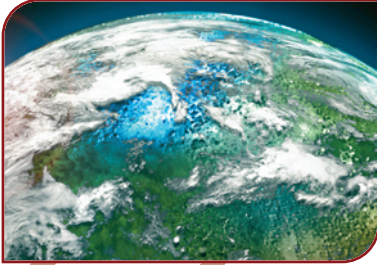

Environment

The Company is continually looking for ways to reduce its own energy use.

Waste management systems are used not only at our own locations but also when working with our customers. The safe handling and correct control of waste is part of our services. These systems are Pan European.

Various Service Industries

International Services

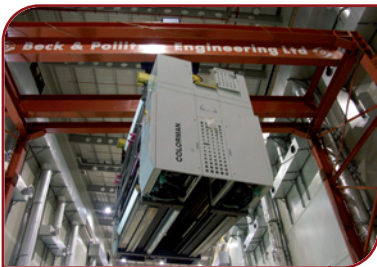

Truly International Engineering Service:

- Long history and vast experience spread across all operating locations
- Local business in each location but international network
- Transferable skills and resources
- Unrivalled knowledge of each local market
- The same high quality service in any location across the world
- Economy of both scale and locations

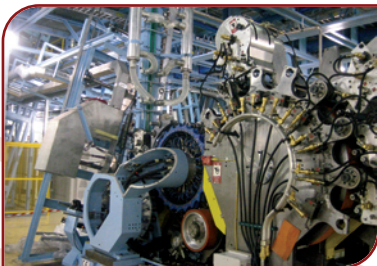

Automotive Industry

- Body / weld shop installation
- Press shops including Heavy Lifting
- Assembly shops
- Automotive conveyors
- Plastics and Paint
- Direct to client or OEM
- International reputation

Printing Industry

- Long history in the print world
- Worldwide capability and reputation
- Newspress
- Commercial
- Sheet-fed
- Specialist in house design of complex installation systems

Beverage Can Manufacture

- Total project management
- High quality reputation in industry
- Worldwide capability
- Integrated total service package
- High quality and high speed service

Various Service Industries

General Manufacturing

- From base metals to final finished consumer goods
- Experience through vast range of industries
- Steels and metals / paper / aerospace / consumer goods / food industry

Commercial & Retail Industry

- Support services to major construction projects
- Escalators and lifts
- Commercial and major industrial
- Rail network and underground
- Fully trained staff and supervisors

Chemical and Pharmaceutical

- Highest quality services
- Matching industrial standards
- Blue chip client base
- Practical solutions in high tech industries
- Highest safety standards

Environmental Industry

- Fast developing industrial sector
- Experience in variety of areas; waste management – reclamation – energy
- Quality services with vast experience and capability
- European wide services
- Developing services to meet demands of this new and growing sector
