

Environmental Policy Statement

GRP Grating Systems have a reputation for quality, innovation, reliability and exceptional service. As a customer focused organisation, the company strives to ensure that all of its activities comply with relevant environmental legislation and perceived best practice. Our core objective is to continually develop and improve in line with environmental management procedures.

To deliver this policy, we will:

- Maintain current and reliable information on the environmental impact of the goods and services it supplies.
- Understand the expectations and sensitivities of its customers, including the pressures of growing and changing statutory and public concern regarding environmental issues, and assist them in complying with environmental best practices through the development of the company's products and services.
- Identify opportunities to reduce any environmental impact of its activities at an early stage and adopt the necessary changes where appropriate.
- Raise staff awareness of environmental issues and promote individual good practice.
- Require its suppliers and factories to provide goods and materials which comply fully with UK Government, EU Legislation and recognised environmental best practice.
- Make efficient and environmentally responsible use of energy, water and natural resources within its own premises as well as in the development, manufacture and operation of the goods and services it provides.
- Employ sound waste management practises including compliance with the requirements of the WEEE Directive.
- Continually monitor and update the policy and procedures raising staff awareness and promoting individual good practice
