

Welcome

When I developed Bio Sculpture® Gel I wanted a product that could be applied over natural nails, gel extensions, or artificial tips, that doesn't chip or wear away at the free edge. I wanted all this with a shiny, flexible, hard protection that gives a neat well groomed appearance.

The Bio Sculpture® Diamond, recognised internationally, is a guarantee of a professional and quality service. Ensure customers can see your Bio Sculpture® logo clearly in your shop frontage.

London - Tokyo - New York - Sydney

Bio Sculpture® Colour Gels

Bio Sculpture® Gel was the first Colour Gel worldwide, and continues to be the Number 1 selling internationally.

Bio Sculpture® Colour Gel is Clear Gel with pigment added, thus not only giving the nail strength and flexibility, but also permanent nail colour. Available in over 100 beautiful fashion colours and French Manicure - refer attached Colour Chart. The Gel cures under a UVA curing lamp in just 2 minutes - no time is wasted waiting for the product to dry. As it dries instantly, imagine pedicures without waiting for the polish to dry! Applied onto natural nails as an overlay, or sculptures or tips, and is compatible with all nail systems. Available in 4 and 10 gram jars.

Always refer to your Colour Stix for a true indication of colour before ordering.

Bio Sculpture® Starter Kit

Our Bio Sculpture® Starter Kit includes everything needed to start offering a vast range of Bio Sculpture Gel services. Most importantly our Starter Kit includes your one day Bio Sculpture® gel training course and half day sculpture training course. We will teach you how to get the best results from our products, and it is this knowledge that will give you the confidence to further enhance your business.

Our Starter Kits vary from time to time and the prices can vary accordingly.

▲ Starter Kit

The Starter Kit contains:

- Clear Gel
- S-Gel
- Free Edge Gel
- Two Colour Gels
- Matching Varnish
- Top Coat
- Executive Base
- Vitamin Dose
- Cuticle Remover
- Cuticle Oil
- Cuticle Conditioner
- Anti-Fungal Spray
- Solutions
- Accessories
- After Care Pad
- UV Curing Lamp
- Technician's Manual
- One day Gel Training Course
- Half day Sculpture Training Course
- Assessment/Exam with Certificate & Badge
- Product Information Book
- A4 Poster
- Bio Sculpture® Leaflets
- PVC Kit Bag

UV Lamps

▼ UV Lamps
MIS416 Black
MIS415 White
MIS414 Pink

▲ UV Bulb
MIS410

UV Lamp Maintenance

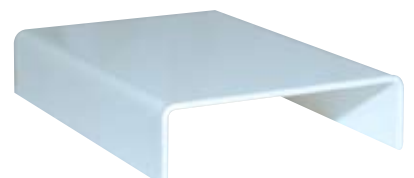

- Place square piece of foil in the base of your lamp to protect it from Gel. Clean the outside of the lamp with Sanitiser – never use Gel Remover, as it will remove the lovely shine.
- Replace UV Bulbs regularly to ensure efficient and proper curing.

TIP Change your light bulbs every 500 hours of use, old bulbs don't go out, they just get weaker. Place a sticker noting date bulbs are changed under UV unit.

▼ UV Lamp Hand Rest

(For the old style lamps that do not have built in hand rests.) This stand allows your client's hand a lot more comfort when curing nails, particularly good when curing the thumb. It fits snug into your UV Lamp and can be removed easily for curing toe nails and cleaning.

MIS421

Bio Sculpture® Gels Flexible Gels

Bio Sculpture® Gel is the quickest nail system, in that it is a one component nail system, merely applied onto the nail, with no time consuming build-up process. It is self-levelling, which eliminates excessive buffing. Bio Sculpture® Gel does not require the use of primers or bonders. Bio Sculpture® Gels can be removed by soaking off with Gel Remover, without damage to the natural nail.

Non-Flexible Gels

▲ Free Edge Gel

Free Edge Gel has a light free edge colour with a non-flexible finish. Free Edge Gel is used to build the free edge when creating sculptures.

GEL120 4gr Free Edge Gel
GEL121 10gr Free Edge Gel
GEL122 25gr Free Edge Gel

▼ S-Gel

S-Gel is mostly used to strengthen, shape and finish nail treatments. Because of its clarity, S-Gel will seal colour gels to a smooth and glossy finish. Due to the non-flexible finish, S-Gel should not be applied as a base layer on natural nails.

GEL110 4gr S-Gel
GEL090 10gr S-Gel
GEL100 25gr S-Gel

► Clear Gel

Clear Gel is a flexible gel, used as the base layer on the prepared natural nail and will provide better adhesion for gels.

GEL080 4gr Clear Gel
GEL010 10gr Clear Gel
GEL020 25gr Clear Gel

▼ Sealer Gel

Sealer Gel is a flexible gel, used as a final layer to finish off natural nails to create a flexible end result. (Naturally soft nails should have a flexible finish to be able to move and flex with them).

GEL071 4gr Sealer Gel
GEL060 10gr Sealer Gel
GEL070 25gr Sealer Gel

▲ Sculpting Gel

Sculpting Gel has a natural nail colour and is Bio Sculpture's strongest flexible gel, mostly used as a base layer to strengthen soft nails and to build a flexible upper arch on soft nails.

GEL050 4gr Sculpting Gel
GEL030 10gr Sculpting Gel
GEL040 25gr Sculpting Gel

► Gel Stirrer

You should always stir your gels before use and the best way to stir them is with this handy stainless steel Gel Stirrer.

MIS255

Bio Sculpture® Application Brushes

◀ ▼ Deluxe Gel Application Brush #4

These brushes are available in two very attractive swirl designs, lilac and white. The handle is light weight perspex, long lasting, comfortable and easy to hold and to keep clean. It has a lid that serves as a brush protector, always keeping the bristles of your brush clean. We recommend you use the lilac one for your colour gels and the white one for your Clear, Sculpture, Sealer and S-Gels.

MIS017 White swirl-design handle
MIS018 Lilac swirl-design handle
MIS253 Brush holder

▼ Deluxe Gel Application Brush #6

This is bigger than our regular #4 gel application brush, which is perfect to use on larger nails.

MIS016 Yellow handle

Brush Maintenance

- After every application, clean brush with Sanitizer
- At the end of every day, clean your brush with Acetone Free Nail Polish Remover
- Soak a piece of Wonderwipe in Acetone Free Nail Polish Remover and place on a square of foil and wrap around your brush, lay flat and you will have a perfect brush for the next day
- To keep your brush handle clean, wipe off excess Gel with Sanitizer

▲ Gel Application Brush #4

MIS015 Wooden handle

▼ Deluxe French Application Brush

This deluxe light weight gel application brush now comes with a slightly slanted edge to the bristles, which ensures an even contour for applying the French Line. The brush has a lid that adds as a protector, always keeping the bristles of your brush safe and clean. The handle is easy to hold and keep clean and comes in a pink swirl design.

MIS020 Pink handle

Bio Sculpture® Treatments

▲ Executive Base Nail Developer

Bio Sculpture® Executive Base Nail Developer is free of Toluene and Formaldehyde. It is a multi-functional conditioning treatment applied on to the natural nail as a nail strengthener for weak, brittle nails. Essential Amino Acid derivatives are necessary for the Keratin chain and are one of its major components. **CLV010**

▲ High Gloss Top Coat

Applied weekly, High Gloss Top Coat will ensure a high gloss shine and protect your Gel. Always use Bio Sculpture® Acetone Free Nail Polish Remover to remove dull scratched Top Coat. **CLV020**

▲ Glitzy Top Coat

Add sparkle to your nail colour with this Glitzy Top Coat, great for parties and the festive season. **CLV100**

▲ Cuticle Oil

Softens and nourishes dry hard cuticles on finger nails and toe nails. Use in Manicures and Pedicures – massage into cuticles before starting your massage. Excellent product to retail for Home Care use for client to massage into cuticles daily. **CLV014**

▲ Lavender Base

Lavender Base is the twin of Bio Sculpture® Executive Base, enriched with Lavender essential oil to aid with moisturising and softening properties on dry, brittle and flaky nails. One coat may be applied under colour polish and as a base coat, or use two coats as a lovely soft colour. Lavender Base is ideal on sore and healing fungus nails. **CLV011**

▲ Vitamin Dose

This easy to use roll-on product is a MUST for maintaining healthy nails. It has a unique form of vitamins that are delivered to the nail bed cells for rejuvenation, moisturisation, strengthening and nourishment. Roll the product on and around the cuticle. The nail cells will open to receive and absorb the goodness. Use on prepared nails, allow to dry and continue with Spa manicure or Gel treatment. **CLV013**

▼ Bio Sculpture® Nail Polish

A fast drying, durable product. It contains double density florenated colour pigment to match our Colour Gels. These specially formulated Polish Colours are used during home after care by retail clients to maintain their nails at home or to temporary change colour on permanent Colour Gel. Available in over 100 beautiful fashion colours – refer attached Colour Chart. **MIS250 Varnish Stand**

▲ Cuticle Remover

Apply to the cuticle area, wait one minute and gently remove the dissolved cuticle tissue with a rubber hoof. Hardened, Cracked Heels? Apply Bio Sculpture® Cuticle Remover liberally to the back of heels wait 2 mins, then gently scrub away now softened dead skin with a Bio Sculpture® Pedi Paddle. **CLV050 12ml**
CLV070 50ml

▼ Nail & Cuticle Conditioner

This moisturising conditioner is massaged into the cuticle and the natural nail after the Gel has been removed from the nail, to prevent dehydration. It contains tiny Jojoba beads that will burst under pressure, releasing moisture into the skin and nails, leaving the surface looking beautiful. **CLV080 50ml**
CLV060 12ml

▲ Dilute

A few drops of Dilute will replace solvent loss in Executive Base and Nail Polish which may evaporate with time and when they are left open for long periods or when the cap is not tightly closed due to a clogged bottle neck, the contents will become thick and thready, this will help to thin them down again. **CLV016**

Bio Sculpture® Solutions

Individually formulated for compatibility with the Bio Sculpture® Gel system.

▼ Nail Polish Remover (Non Acetone)

Used to remove Nail Polish, High Gloss Clear Coat, or Executive Base. As Bio Sculpture® Nail Polish Remover is Acetone free it will not harm or cause damage to your Gel.

SOL005 100ml (Retail)
SOL010 250ml (Salon)
SOL020 1 Litre (Bulk)

▼ Finger Spas

'Little Dipr's' are ideal for removing your Gel, pour the Gel remover into the top of the clear container, carefully insert the fingernail into the liquid chamber by twisting and leave for 10 to 15 minutes to soak off Gel. Pack contains 10 wearable nail soakers.

MIS505 Pack of 10

▲ Dual Cleanser

This multi-purpose solvent contains no oil and is used to clean and prepare the nail plate before product application. Dual Cleanser will remove nail polish, top coat, cuticle remover, loose skin, filings, dust, superficial oil and water from the nail without dehydrating the natural nail. It may be used between layers during gel treatments as well as after gel treatments, to remove the sticky residue, before applying top coat. This product is an alternative to the Sanitizer and Nail Polish Remover as it does the job of both of them, making it easier for the nail technician to have only one product doing everything.

1 litre Dual Cleanser SOL021
250ml Dual Cleanser SOL022
100ml Dual Cleanser SOL023

◀ Spray Pumps

Available to fit 100ml & 250ml bottles.
MIS309 100ml
MIS310 250ml

▼ Bio Sculpture® Pump Dispensers

These fantastic vacuum dispensers are extremely popular. Fingertip pump, easy to use and no more leaks or spills. Great for cleaning your Application Brush – dispense a small amount into the spout, swish your brush in the Sterilizer and dry. Couldn't be easier!

SOL200

▼ Quick Dry

Allow Nail Polish or High Gloss Clear Coat to 'settle' for 1 minute, and spray wet nails. Nails will be dry to the touch in 2 minutes.

SOL070 100ml
SOL080 1 Litre

▲ Sanitizer

Sanitizer is used to remove traces of oil from the natural nail, in preparation for a Gel overlay, or to remove the sticky residue after the Gel is cured.

SOL100 100ml (Salon)
SOL050 250ml (Salon)
SOL060 1 Litre (Bulk)

▲ Gel Remover

Used to remove Gel from the nail, Gel Remover will soften and break down the bond, releasing the Gel from the natural nail, without damage.

SOL090 100ml (Salon)
SOL030 250ml (Salon)
SOL040 1 Litre (Bulk)

Bio Sculpture® Skin Care

▲ Barrier Cream

The perfect product for Nail Therapists with sensitive skin, Bio Sculpture Barrier Hand Cream will help protect and re-hydrate hands.
MIS059

▲ Antiseptic Moisturising Hand Gel

An instant sanitizer that cleans and disinfects hands whilst leaving them soft and moisturised.
SOL300
