

Freddy KEVA Range

 **Atex vacuums**

Freddy[®]

The Freddy range of KEVA vacuum cleaners has been purposely designed, built, tested and approved as suitable to pick up potentially explosive and conductive dust and debris in a Dust zone 22. The Type H models are also suitable for picking up dust and debris that is hazardous to health in a Dust zone 22. All models are built using an electronically commutated brushless motor featuring soft start and thermal protection.
