& VALUES

Samlite Product Maintenance Screen.

Samlite Daily Hourly Totals Screen.

Samlite Daily Product Sales Screen.

## Features & Benefits

- Choose single store or multiple branch licenses providing comprehensive reporting for both one location or consolidated branches.
- Samlite tracks sales quantities & values for each product sold providing detailed, comprehensive reports on sales & profit. historical sales reports are available by date range & comparative periods.
- Samlite can also control maintenance of product files including prices & promotions.
- Samlite automatically collects detailed sales information from the point of sale either directly to your back office pc via ethernet, PSTN or ADSL broadband.

## Reporting - Keep In Touch

- Reports via email, or SMS text to your mobile phone – Samlite will bring the sales to you wherever you are. it is possible to schedule

a timed event for user groups to receive sales information via email or text message. the system will send, total product sales including profit & a sum of mix & match discounts, including financial totals such as cash in drawer.

- Historical sales reports are available by date range & comparative periods.
- Samevent contacts you – if for any reason samevent can not

complete a schedule communications event, you can elect to be notified by email/text messaging explaining which branch hasn't succeeded & the reason.

## Information Sharing Features

- Import/export – the import & export module is no longer an additional module & is included in samlite. there is the additional enhancement of being able to export a file for a selected

location to a spreadsheet, amend the details, & import back to Samlite.

- ICR accounts – the upload & download of customer info for the icr software is now available, including customer transaction view & print.
- Fast Excel report – within each report view, a microsoft excel icon has been added which allows direct output of the on-screen report to Excel spreadsheet.
