tea tree organic range
product guide

Our range of natural Tea Tree products are free from parabens, sodium lauryl sulphate, SLES, mineral oils, synthetic fragrance and propylene glycol. None of our products have been tested on animals and each is free from harsh synthetics or man-made chemicals.

Nowadays we are no longer content with purchasing a product just to pamper ourselves, we feel the need to go back to nature to relieve the stresses and strains of everyday life. To do this we need to protect the environment the plants have been grown in and the local people who have harvested them.

The exotic Australian fruits and plants chosen to enhance our range are obtained from an Australian Company who work and financially support the Australian Indigenous people who plant and harvest the plants in often remote, wild and economically disadvantaged regions of Australia, respecting traditional culture and knowledge.
