---

*Products for professional treatment*

*Choose the most appropriate Olos Natura line according to skin's needs.  
Cleansing milk, Tonic lotion, Scrub, Fitoessenze, Serum or Fluid and Cream*

*Pack mask main ingredients:*

*Mineral salts, Butcher's-broom extract and Chamomile.*

# How to carry on the treatment

1 Turn on the Vaporix appliance and direct steam onto the face, neck and neckline. Cleanse the entire area with cleansing milk.

2 Carefully cleanse using the most suitable Scrub and the small Puriderm Dermatron brush (turn off steam).

3 Dab tonic lotion on the entire area with two cotton floccs.

4 Apply the most suitable Fitoessenza.

5 Massage the most suitable serum or fluid onto the face, neck and neckline according to skin's needs.

6 Dose 3 measures of the Fitomarina powder into a bowl. Add 3-4 measures of cold water and mix quickly with the provided spoon until evenly blended.

7 Apply the Fitomarina Pack mask onto the face, neck and neckline using the spatula. Turn on the Vaporix, but avoid aiming steam directly on the face. Leave to work for 15 minutes.

8 Remove the Fitomarina Pack mask by lifting the edges; remove any residue with damp cleansing gloves (turn off steam).

9 Dab the entire area with two cotton floccs soaked in tonic lotion. Complete the treatment by massaging the most suitable cream for the skin type.
