

NATURAL EFFECTIVENESS PROVEN BY CLINICAL TESTS

Latest-generation formulas with **proven effectiveness** combine Glycolic Acid, an extract that contains Lycopene and a Sugar Complex.

GLYCOLIC ACID, an alpha hydroxy acid extracted from sugar cane that **smoothes**, moisturizes and **brightens** skin by **exfoliating** the corneal layer. It stimulates and promotes cellular turnover, fighting the signs of aging. This way, it evens out the skin surface, corrects imperfections and leaves the complexion renewed, smoother and softer.

A clinical test was conducted to demonstrate the **REGENERATING** action of Glyco Program products based on Glycolic Acid *. The test has proven that these products can stimulate the growth of keratinocytes, consequently showing an epidermal renewal thanks to cellular turnover.

*test on 60 and 90 PLUS serums, Face regenerating night cream

LYCOPENE*, a carotenoid extracted from tomatoes, with powerful anti-oxidant properties. In vitro tests have shown that Lycopene, compared to Vitamin A and to other anti-oxidants available in nature, including Vitamin E, proves to be the most efficient radical scavenger. This is because it helps prevent oxidation and the absorption of reactive free radicals, which are neutralized before they have a chance to damage the cells. Lycopene also protects skin against photo-aging.

* Extract containing Lycopene

SUGAR COMPLEX, a mix of carbohydrates that acts as a "water magnet", regulating and retaining water in the skin surface. Moreover, it carries out a post-AHA decongesting action, raises the skin tolerance threshold and protects it against dryness and irritation.

Clinical tests have proven the ability to improve the level of moisturizing in the epidermis by up to 40% and to reduce by 68.9% the symptoms of irritation, the bothersome post-AHA feelings (tingling, burning, itching and dryness).

Tests carried out by PENTAPHARM with 5% of Sugar Complex

WHOM THE TREATMENT IS RECOMMENDED FOR

Glyco Program is the ideal treatment to help skin regenerate itself and regain new vitality. Its periodical use is recommended to renew skin, any time it looks asphyctic, thickened, dull and tired. Specifically: at the change of season, after a stressful period, in case of wrinkles, dyschromias and spots.

Thanks to the action of Glycolic Acid used in moderate concentration, combined with anti-oxidant and moisturizing active ingredients, **Glyco Program** is capable of eliminating dead cells on the skin surface, with effects on the complexion, which immediately appears fresher, transparent and radiant.

The frequency of the treatment and the number of sessions can be determined after a thorough check-up, based on the skin conditions and needs.

Prior to starting a session of GLYCO PROGRAM treatments at the Beauty Salon, it is advisable to recommend to the customer the daily use of the Face regenerating* night cream and of the Face revitalising day fluid with sunscreens.

TABLE ON THE USE OF 60 AND 90 PLUS FACE SERUMS

	60 PLUS MEDIUM Face regenerating serum	90 PLUS STRONG Face regenerating serum
LIGHT AND THIN SKINS	FOR THE FIRST SESSIONS (3-5 minutes)	FOR SUBSEQUENT SESSIONS (3-5 minutes)
DARK, RESISTANT AND THICK SKIN	FOR THE FIRST SESSION (3-5 minutes) SECOND and/or THIRD SESSION (5-10 minutes)	FOR SUBSEQUENT SESSIONS (5-10 minutes)

Gradually increase the application time, session after session, if necessary up to a maximum of 10 minutes.

WARNINGS

Avoid contact with eyes and mucous membranes. In case of irritation, discontinue use. Do not apply on irritated skin. Avoid exposure to UV rays.

SKIN APPEARS LIKE NEW AND REGAINS BRIGHTNESS,
TRANSPARENCY AND SOFTNESS.

AT THE BEAUTY SALON

Five separate phases during which the active ingredients alternate according to a sequence specifically designed for a safe and effective application thanks to their optimal percentage.

PRODUCTS FOR TREATMENT AT THE BEAUTY SALON

Description	Code	Package
Face cleansing milk	OT0032	250-ml bottle
Face tonic lotion	OT0132	250-ml bottle
Face preparing gel	OT0232	250-ml bottle
60 PLUS MEDIUM – Face regenerating* serum	OT0005	10 5-ml bottles
90 PLUS STRONG – Face regenerating* serum	OT0105	10 5-ml bottles
Anti-oxidant treatment** – Face serum	OT0332	10 20-ml bottles + 10 100% cotton gauzes
Face restorative mask	OT0030	150-ml tube
Face revitalizing day fluid with sunscreens	OT0023	150-ml bottle

HOW TO PERFORM THE TREATMENT

PHASE 1 PRELIMINARY WITH GLYCOLIC ACID

- Carefully remove all traces of make-up, cleansing the face, neck and décolleté with the Face cleansing milk.
- Dab the face with cotton balls soaked in the Face tonic lotion.
- Apply the Face preparing gel evenly on the entire area to be treated and gently massage the product, insisting on the more thickened areas. Then rinse thoroughly using disposable gloves soaked in warm water.

PHASE 2 REGENERATING INTENSIVE WITH GLYCOLIC ACID

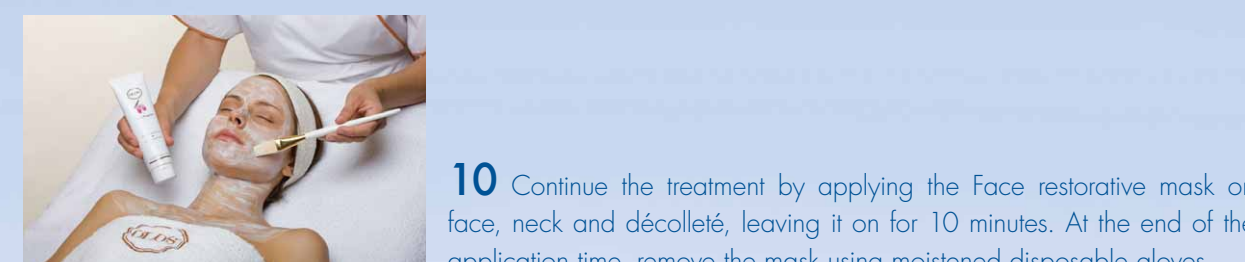

- Using the special fan-shaped brush, apply the 60 PLUS MEDIUM - Face regenerating* serum or the 90 PLUS STRONG - Face regenerating* serum, starting from the more thickened areas (forehead, nose, chin) and continuing with the more delicate ones (décolleté, neck, cheeks).
- Leave the product on for the recommended time (see the table on the use of serum), continuing the massage with the aid of two fan-shaped brushes. The massage will contribute to alleviating the tingling feeling caused by Glycolic Acid.
- At the end of the application time, remove the product using disposable gloves soaked in cold water.

PHASE 3 ANTI-OXIDANT WITH SUGAR COMPLEX AND EXTRACT CONTAINING LYCOPENE

- Prepare the Anti-oxidant** treatment - Face serum: place the special gauze, previously folded, in a basin and then soak it evenly with the face serum.
- Apply the gauze to the entire area being treated, making sure it sticks properly, and leave it on for 10 minutes.
- At the end of the application time, remove the gauze mask and gently massage the remaining face serum until it is absorbed completely.

PHASE 4 RESTORING WITH SUGAR COMPLEX AND HYALURONIC ACID

- Continue the treatment by applying the Face restorative mask on face, neck and décolleté, leaving it on for 10 minutes. At the end of the application time, remove the mask using moistened disposable gloves.

PHASE 5 PROTECTIVE REVITALIZING WITH SUGAR COMPLEX AND EXTRACT CONTAINING LYCOPENE

- Finish the treatment by applying the Face revitalizing* day fluid with sunscreens, massaging until it is absorbed completely.
- To maintain the results obtained at the Beauty Salon, recommend to the client the use of Glyco Program products at home.

AT HOME

A daily skincare **program** that takes care of the skin every single day and gets it ready for the treatment at the Beauty Salon. Specific products that protect during the day and regenerate during the night.

Face cleansing milk

It removes make-up and impurities, to smooth and renew the epidermis.

Face tonic lotion

It restores freshness and vitality to the skin.

Face revitalizing day fluid with sunscreens – SPF25**

Ultra light and quickly absorbed by the skin, it contains active ingredients that regulate the level of moisturizing, raise the skin tolerance threshold and fight free radicals.

Face regenerating* night cream

Specific for the night, it intensively regenerates* the skin. Rich in Glycolic Acid, it stimulates cellular turnover* in order to exfoliate the corneal layer and smooth the skin grain.
