

THE ACTIVE INGREDIENTS THE TREATMENT AT HOME

The result of the most advanced cosmetic innovation is a pool of selected active ingredients that work in synergy.

LIPOSOLUBLE VITAMIN C

A powerful anti-oxidant and anti-age

action: it stimulates cellular renewal and the synthesis of collagen, slowing down its deterioration. Thanks to its special liposoluble formulation, it offers excellent stability and improves the absorption of Vitamin C at the percutaneous level.

EXTRACT OF MICROENCAPSULATED LIQUORICE

It regulates the production of the tyrosinase, the enzyme responsible for melanogenesis, the melanin formation process. It has **unifying and brightening effects**. The microencapsulation technology protects this active ingredient so that its integrity and functionality can be maintained and its gradual release can be ensured, for long-lasting effectiveness.

EXCLUSIVE ADM™ COMPLEX, DERIVED FROM AZELAIC ACID

Unifying action on the complexion both at the entire skin surface level and on localized hyperpigmented areas.

ECLAVIS™

It has excellent dermo-cosmetic properties. **It improves the microcirculation and the skin surface oxygenation**, with instant brightening effects.

HYALURONIC ACID, SHEA BUTTER, SUGAR HYDRATING AGENT

Featuring an intensively hydrating, nourishing and protective action.

Product description	Code	Content
Unifying anti-spot* serum	DW0114	30 ml bottle
Regenerating** and anti-spot*** day cream	DW0218	50 ml jar
Regenerating** and anti-spot*** night cream	DW0318	50 ml jar

The manual treatment at the beauty salon

1

Cleanse face, neck and décolleté using the cleansing product most suited to the skin, then remove the product using the disposable gloves, previously dampened with lukewarm water.

2

Dab the tonic lotion most suited to the skin type on face, neck and décolleté using two cotton balls.

3

Apply 5 ml of **Matrifluid™ activator**, massaging it on face, neck and décolleté.

4

Open a package of **Matrigel®** and take it out, making sure your hands are dry.

5

Continue by applying the **Matrigel®** patches on forehead, cheeks, chin and neck, then dissolve them with the help of a fan-shaped brush soaked in **Matrifluid™ activator**.

6

Proceed with the manual massage, being careful to keep your fingertips dampened with **Matrifluid™** so that the product can be distributed on the entire area being treated.

7

The massage should last 20 minutes; at the end, thoroughly remove the product using the cleansing gloves, previously dampened.

8

Apply the **Unifying anti-spot serum®** on any hyperpigmented areas and massage it in for a few moments. Complete the treatment by applying the **Unifying cream**, massaging until it is completely absorbed.

9

Recommend the **Hi-White** home care products to the client.

The treatment with the equipment

HI-WHITE with Dibiskin Power

In case the treatment is carried out with Dibiskin Power, replace step 3 as follows.

Apply 5 ml of **Matrifluid™ activator** with a brush on the area to be treated, starting from the décolleté, then proceed with the vehiculation with Dibiskin Power for 10 minutes at the most.

Continue from step 4 of the manual treatment.

HI-WHITE with Dibiskin Ultra

In case the treatment is carried out using Dibiskin Ultra, replace step 3 as follows.

Pour the selected tonic lotion into a bowl and use a brush to apply it to the area being treated, starting from the décolleté. Turn on the CLEANSING phase and use the tips according to the Dibiskin Ultra method for 10 minutes.

Using a brush, apply 4 ml of **Matrifluid™ activator**, starting from the décolleté, turn on the PERMEATION phase and use the tips according to the Dibiskin Ultra method for 10 minutes.

Using a brush, apply 4 ml of **Matrifluid™ activator**, starting from the décolleté, then turn on the PATTING phase and use the tips according to the Dibiskin Ultra method.

Continue from step 4 of the manual treatment.

The anti-age and anti-spot treatment

ACTIONS

Dibi expertise and the cutting-edge research of its laboratories have made it possible to develop the **1st professional treatment with an anti-age, anti-spot, unifying and brightening action.**

EFFECTS

A technologically innovative treatment in terms of quality and effectiveness, capable of stimulating the **renewal of fibroblasts, brightening skin and counteracting skin hyperpigmentation** and chromatic irregularities of the epidermis.

The integration and synergic combination of the **two pieces of equipment** allows for a truly effective and complete treatment, crucial in order to ensure visible results that are immediately visible and functional over time.

WHO IT IS RECOMMENDED FOR

All skin types that need an **anti-age, anti-spot, unifying and brightening** action.

FREQUENCY

The frequency of professional treatments can be determined only after a thorough check-up.

DURATION OF THE TREATMENT

Approximately 1 hour.
