Why Gradius

During the late 1990s Gradius introduced wall protection systems to complement its broadening contract interior portfolio.

The business has demonstrated impressive growth and market presence in healthcare, education and commercial office applications throughout the UK and France.

This success has been accomplished as a result of a strong partnership between Gradius and the InPro Corporation, a leading US manufacturer of door and wall protection, expansion joints, cubicle track and curtains.

This partnership has over 10 years experience of Gradius manufacturing & marketing InPro-designed wall protection products, and is now strengthened and expanded to cover a number of new markets including the entire continent of Europe.

Wall Protection Systems

Provides a comprehensive package of products designed to protect walls, corners and doors against damage from pedestrian and wheeled traffic.

Repair and maintenance costs are therefore reduced, whilst the overall appearance of the interior is maintained throughout its life.

Ideal for all contract environments and applications.

Healthcare Zone

Healthcare environments are traditionally subject to high levels of wheeled and pedestrian traffic, ranging from doctors and dentists surgeries through to nursing homes and hospitals. All environments require tailored protection solutions to suit the individual applications.
