The Harmony L.E.D. 6G is a scientifically-engineered, precisely-calibrated authentic L.E.D. (Light-Emitting Diode) lamp of exceptional quality. It's specially-designed for rapid, efficient gel curing, particularly for the newest gel-polishes such as Harmony's **gels** and the latest high-performance **gels**.

The Harmony L.E.D. 6G will quickly and comfortably cure gels to effectively ensure the smoothest, most level gel-drying. The quiet, compact yet rugged Harmony L.E.D. 6G lamp is guaranteed to provide years of reliable in-salon performance, without any variations in curing-time temperatures while consistently producing properly-cured gels.

L.E.D. lights are faster and more reliable, far better for gel application than UV light. Now, never replace a bulb again: the Harmony L.E.D. 6G's LED lights won't ever need bulb replacement... unlike UV lamps that have 4 or more bulbs which require full replacements every few years.

And the Harmony L.E.D. 6G LEDs last up to 50,000 hours of normal salon use without any diminished brightness or power throughout the product's entire lifespan. Guaranteed!
