

Bathroom

We are proud of our reputation for making the highest quality products, supported by decades of experience. Our bathroom range has been tried and tested the world over.

Bathroom

Choosing the right raised toilet seat

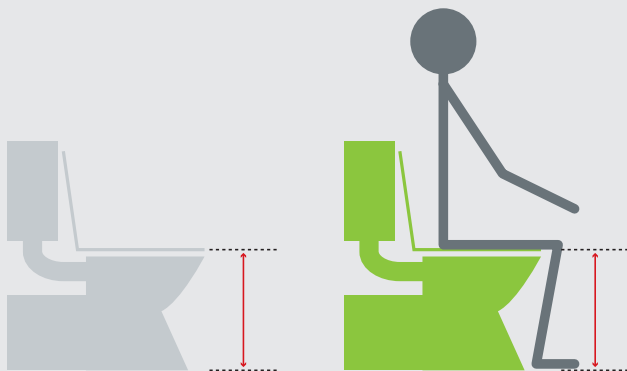

Gordon Ellis & Co are acknowledged experts in raised toilet seats. We have a seat to suit almost every need, as we produce the widest range of seats of any manufacturer.

Here is our easy guide for selecting the right seat:

MEASURING

In most cases, your knees and hips should be at the same height when sat on the toilet seat. A seat that is too low can be uncomfortable and more difficult to stand up from.

1. Measure the distance between the floor and the back of the thigh, just behind the knee. This is the recommended seat height.
2. Measure the current height of the seat, and subtract from the first measurement.
3. The difference between the two is the amount of raise required.

Raised toilet seats come in 2 inch (5cm), 4 inch (10cm) and 6 inch (15cm) standard sizes. Round down to find the nearest standard size.

FITTING

Most of our Raised Toilet Seats use brackets to hold the seat in place on the toilet bowl. There are either two, three or four brackets, which are designed to be tightened by hand.

For security, our raised toilet seats are never fixed on top of the original seat, but directly to the toilet pan.

Some of our models, such as the Nobi and Big John, replace the original seat. These are easily fixed like a regular toilet seat, using the two existing holes in the back of the toilet bowl. Clear instructions are included with all our seats, but

please always check that it is securely attached before you sit down.

This advice is intended as guidance and should not replace a thorough risk assessment. If in any doubt, please seek further information from an Occupational Therapist.

Prima Raised Toilet Seat

- Easy to clean high gloss finish, with no seams to trap dirt
- Fits securely on to most UK toilets
- Optional lid

The Prima Raised Toilet Seat reaches the highest standards in injection moulded toilet seats and is easy to clean, due to its concealed seam. To give the user confidence, the seat is designed to be very stable in use. It fixes securely in three places, with two side brackets and a drop nose at the front. Each side bracket has over-moulded rubber grips to ensure a tight fit on to the toilet.

To provide a full range, our Prima 6 inch seat uses the same design as our Ashby 6 inch.

Prima

The **Deluxe model** has a matching strong white lid, which can be used as a bathroom seat if required.

190kg 30 Stone / 420lbs

Nobi

- Strong, stable and stylish
- Stainless steel fixings to suit all toilets
- Arms integrated into the seat make standing easier

The stylish Scandinavian design of the Nobi toilet seat has set the benchmark for all bathroom aids, as it is both practical and attractive, with a high gloss finish.

The seat's integrated arms offer stability and are a valuable aid when standing up from the seat. It provides a secure, safe and comfortable alternative to traditional toilet seats. Compared to a toilet frame, the Nobi seat can also fit neatly into a smaller bathroom.

The **Lift model** also adds a three inch (7.5cm) raise, to help those who find it difficult to sit, rise, or transfer from the low height of most toilets.

The **Family model** has both the standard size seat and a unique small aperture seat for children and smaller people. This seat can be lifted up out of the way when not required, or unclipped for cleaning.

Strong stainless steel brackets fix the seat to any toilet pan, replacing the existing seat. All **three models** include a matching lid.

Enterprise

- 4 inch (100mm) raise with built-in arms
- Fixing bracket works with any bowl
- One piece moulding for hygiene

The **Enterprise model** acts as both a raised toilet seat and a toilet surround rail, giving support and stability. The arms support the user in a high position for easy transfer and the 4" (100mm) raised seat makes it easier to stand from the seated position. The seat is a comfortable one piece moulding. The unique installation system allows the seat to be used without taking off the original toilet seat. An installation bracket is attached by loosening the seat bolts, sliding the bracket into place, then re-tightening the bolts. Once this bracket is in place, the seat can quickly be installed and removed.

Derby P-Guard

- Prevents splashes and accidents
- Easy to fit and clean
- Adjusts to suit a toilet or commode

A solution for the embarrassing and unhygienic accidents that can sometimes happen when men have to sit to use the toilet. The **P-Guard** has two parts: a soft plastic cup to deflect urine down into the toilet, and a fixing bracket with flexible links, allowing the cup to be positioned for individual needs or bent away. The cup slides quickly on and off the fixing bracket, making it possible for others to remove the P-Guard when they are using the toilet, or for easy cleaning. It comes with an adhesive pad to fix it to a standard toilet or commode, or it can be permanently attached to a raised toilet seat using screws (not included). **Suitable for adults or children.**

Product Weight

60341 P-Guard: .0.1 kg (3.5 ounces)

P-Guard

Ashby

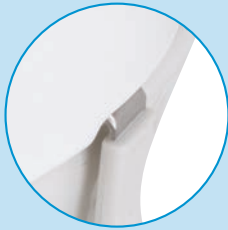

- Three year guarantee
- One piece moulding for ease of cleaning
- Anti-bacterial protection available

An Ashby Raised Toilet Seat is a simple way to reduce bending and the danger of over-balancing for those with limited mobility.

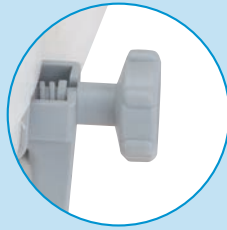

It is perfect for healthcare issue, as the one piece moulding can be totally immersed for cleaning, or sterilised in an autoclave. The bulk packs feature anti-bacterial protection as standard, permanently moulded into the seat. An Ashby seat can be fitted securely to most toilets in a matter of seconds, locked on with brackets that are easily adjusted by hand. The top of the seat is shaped to distribute the user's weight over a greater area, providing a comfortable seat and helping to hold the occupant in position. A wide cut away at the front allows easy access for personal cleaning.

The Ashby Raised Toilet Seat is available in three heights; 2, 4 and 6 inch (5, 10 and 15 cm). The **Deluxe models** incorporate a lid which is strong enough to be used as a bathroom seat. The lid is supported by a high quality hinge which resists falling down and can be cleaned.

Durability: Ashby Standard models have three adjustable brackets to hold tightly onto the toilet pan. Made with durable metal fixings for a long life in use.

Cost saving: The Easyfit models feature two plastic brackets with rubber over-moulding for a secure hold on the toilet pan. These models combine all the benefits of the Ashby range with our most economical brackets.

Accessibility: The Super models have our unique easy screw wheels. If there are others in the household who regularly prefer to remove the raised toilet seat, an Ashby Super would be a good choice.

Hygiene: The Wide Access model has the widest front and rear cut-aways available, giving the user or a carer the best possible access for cleaning. This style also facilitates cleaning with water. It features four brackets, two on each side, to create the most secure fit out of our raised toilet seat range. This additional stability can assist in a safe side transfer, or when there is a lot of movement on sitting down.

Cosby

- Economical design for a competitive price
- Comes with a lid and attractive retail box
- Suitable for standard and elongated toilets

The Cosby Mark 3 Raised Toilet Seat with Lid has a high quality white gloss finish and provides a 4 inch (10cm) raise. The **Cosby model** seat brackets have 180° bumpers and more adjustability than standard fixings. These two unique features allow the seat to be used on the widest range of toilet pans, even if very wide or narrow, elongated or another unusual shape. There are three adjustable brackets in total, two at the back with 180° bumpers, and a third at the front to securely hold onto almost any toilet pan. The fitted lid can be used as a bathroom seat.

Derby

- The ultimate quality toilet seat
- Manufactured to exacting standards
- Quality fixings and high gloss cream colour

The Derby Raised Toilet Seat is a long established and trusted name, sold worldwide since its launch in 1978. We still produce the seat to the same exacting standards, including sturdy metal fixing brackets to hold it in place and a high quality barrel hinge for the lid, which give the Derby seat a long service life and the feel of real quality manufacturing. It has a deep skirt for hygiene and a dipped front to allow the user access for personal cleaning. Available in two heights: 2 inch (5cm) and 4 inch (10cm). The finish is a high gloss cream colour.

The Prima Multi-Frame improves the age-old toilet frame design with an innovative swan neck front. This allows the frame to get even closer to the toilet pan, reducing the trip hazard inherent in all toilet surrounds.

The frame is height adjustable to best suit the user's needs. It can be used freestanding, as the four non-slip feet help to keep it steady, or it can be fixed to the floor to provide more stability when needed. It is supplied flatpack, but is easily assembled without the need for any tools. Comfortable moulded plastic toilet and shower seats are available, which clip easily on to the frame, making it the most versatile frame. Optional arm caps are available.

190kg 30 Stone / 420lbs

Cosby Toilet Aid

- Smooth contoured shape
- No seams to trap dirt
- Anti-bacterial protection

A comfortable and easy to use toilet aid, with convenient built-in arm rests to provide a stable and safe base. The seat is a smooth one piece moulding with anti-bacterial properties. It has no seams to trap dirt and clips easily on to the height adjustable frame, without needing any tools. The frame has six height options in 1 inch (25mm) increments and cranked legs to ensure that the four ferrules sit flat on the floor. If additional stability is needed, an optional floor fixing kit is also available.

Ashby Toilet Aid

- Easy to clean with traditional seat shape
- Strong frame provides arms for stability
- Wide front access

Designed with the comfort of the user in mind, the Ashby Toilet Seat and Frame provides a familiar toilet seat shape, combined with a strong height adjustable metal frame. The large and comfortable seat simply clips on to the frame, which has built in arms to allow a safe transfer on and off. The seat is hygienic, with anti-bacterial properties to help guard against cross contamination, a deep splash guard and a cut away at the front to make personal cleaning easier. An optional floor fixing kit is available to add even greater stability.

Voyager

- Award winning lightweight design
- Commode, over-toilet chair or shower chair
- Folds down to make travelling easier

Ideal for travelling, as well as in the home, this folding commode combines convenience with comfort. The Voyager can be used as a shower chair; an over-toilet chair and a commode (using the included commode pan), perfect for holidays away or visiting family. The aluminium frame will not rust and is light and small when folded, but strong and height adjustable. An optional carry bag is also available, part number 6137.

Prima Bath Step

- Adjusts to the right height for you
- Can be used as a single step or linked to create a staircase
- Large slip resist surface for comfort and grip

Product Codes

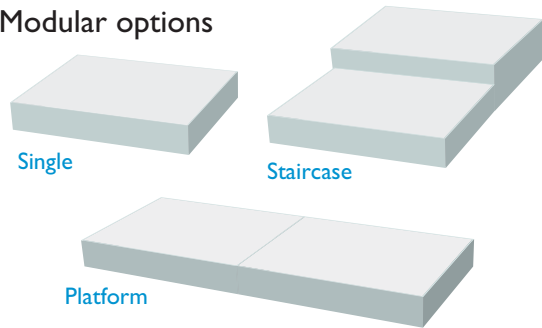

- 62920 Single retail pack
- 62925 Bath steps (bulk pack)
- 61920 Additional raiser sections (bulk pack)

This attractive bath step raises the level outside the bath to match the inside of the bath, helping to reduce the possibility of over-balancing. It features a large surface area with built-in pads to add grip, making the step steady in use and giving the user additional confidence in the bathroom.

The Prima Bath Step is modular, meaning that it can be used as an individual step at your choice of height, between 2-12 inches (50-300mm) subject to your risk assessment. It can also be linked together with additional steps to create a larger platform step, or several steps up to a bath, making it our most versatile bath step.

Each box contains a 2 inch (50mm) step, plus two 1 inch (25mm) raiser sections, four soft feet to reduce slipping and a link bar to connect two steps together, side by side. Additional packs of raiser sections can be bought separately (part number 61920), to adapt the step to the user's exact needs.

Modular options

318kg 50 Stone / 700lbs

Prima Bath Step

Langham K40 Step

- Adjustable step, ideal for the bathroom
- Add or remove layers for the perfect height
- Helps avoid over balancing

The Langham Adjustable Platform Bath Step is modular, allowing extra sections to be added or removed as needed. Each section is 1 inch (25mm) thick and slots securely into the section below, building into a secure, stable platform. The step is supplied with four sections, giving a basic step of 4 inches (100mm). Two steps can be used to build a step up to 8 inches (200mm) tall. The K40 step is not just useful as a bath step – it can also be used in any room where a platform is needed, such as beside a bed, or for correct positioning at a desk.

Product Weight

Prima Grab Bars

- Innovative design with no visible screws once installed
- Soft ribs help to improve grip, even when wet
- Attractive and warm to the touch

The Prima Grab Bar range is high quality, in both appearance and use. The outside of each grab rail is made of white plastic with ribbed grips, to prevent the user's hand slipping down the bar, and are always warm to the touch, unlike metal rails. The range has been ergonomically designed with an oval cross-section, and features a high load limit, made possible by a strong concealed aluminium core, which runs through the middle of the rail.

The angled grab bars give the user a forearm support whilst pulling up, which is useful for someone with painful hands or wrists, as it distributes body weight through the forearm. The screws and strong fixing points are covered by two end caps, hiding them from view. The 16 inch (41cm) straight grab rail matches the standard wall stud distance.

Grab rails are subject to significant forces, therefore it is essential that they are fitted according to the instructions, or seek professional advice from a qualified tradesman.

Prima Modular Shower Chair

- Non-rusting: will not leave rust marks in the shower
- Lightweight: easy to move if needed
- Flexible: height adjustable legs and modular design

The Prima Shower Chair is modular and can be made up to meet the user's particular needs. A complete chair can be made into a simple shower stool, or a stool with just arms. Each part simply clips together, without the need for any tools.

The chair has a smooth contoured back rest, shaped to give a more comfortable support for the user's back.

Aluminium does not rust in the shower unlike many steel shower stools and is very lightweight. The legs are height adjustable, with rubber ferrules at the end of each leg to provide grip and help prevent slipping, even on wet surfaces. Holes in the metal work help to prevent water collecting inside.

- 66170 Simple Aluminium Shower Stool: 2kg (4.4lbs)

Prima Shower Chair

Choosing a bath board

Bathing

A hot bath is a relaxing pleasure which many take for granted. If bathing has become difficult, there are several ways to adapt your bath to make it safer and easier, which are both quick to fit and unobtrusive, helping to avoid substantial changes to a bathroom.

Bath Boards

A bath board helps when stiff joints or poor balance prevent someone from climbing over the side of the bath, and is secured in place with four sliding pillars. The user sits on the board, feet outside the bath, then slides toward the middle of the board, swinging their legs over the side. They can then sit on the board, to shower, or lower themselves down into the bath.

Bath Seats

Bath seats can be used on their own, or paired with a bath board. Bath seats are secured to the bottom of the bath with four large suckers. They are particularly helpful for those who have difficulty getting down all the way into the bath, but still allows them to be in the warm water.

	Cosby Bathboard	Derby Bathboard

Derby Bath Board

- Strong and secure over bath seat
- Slatted for water run-off
- Easy to use and clean, by hand or autoclave

The Bathboard is made as a one-piece plastic moulding, making it lightweight and strong, hygienic and easy to use. It has a range of improvements over a standard bathboard, such as a coccyx cutaway for comfort and a soap dish at both ends. It is fixed to the bath using four independent rubber ended pillars, which are positioned to fit securely in a variety of different bath shapes.

Cosby Bath Board

- Comfortable and ergonomic seat area
- Adjusts easily and fits securely to most baths
- Designed to match Cosby bath seat

The Cosby Bathboard is made up of two parts. The top is a plastic seating area, which has been designed without any slats or holes for comfort. This is strengthened with waterproof plywood, making the bathboard strong yet slim, at just 1 inch high (25mm). To hold the bathboard in place, there are four pillars which secure the board against the sides of the bath. This bathboard has the greatest range of adjustment, suitable for baths with an internal measurement of 480 - 700mm (19 - 27.5 inch).

Derby Bath Seat

- Makes bathing safer and more comfortable
- Width adjustable for narrow baths
- Easily removed for cleaning

The Derby Bath Seat has been designed to sit neatly in a bath, with a smooth comfortable seat and sturdy ABS construction giving durability and security. Four large suckers hold firmly onto the base of the bath. The legs are width adjustable to suit narrow baths and each has a pull tab for easy removal when not required. The seat has a light texture to help reduce the chance of slipping off. It has no uncomfortable slats or ribs. Available in two heights, 6 inch (150mm) and 8 inch (200mm).

Cosby Bath Seat

- Makes bathing easier
- Lightweight and quick to remove
- Smooth contoured seat for comfort/drainage

The Cosby Bath Seat makes bathing easier for anyone who has difficulty getting up or sitting down in the bath. The sturdy but lightweight seat has a textured surface to help prevent slipping and a cut away area at the front for personal cleaning. The four legs have large suckers to fix the seat securely to the base of the bath. Each sucker has a pull tab for easy removal when required. The Cosby Bath Seat is only suitable for baths with a smooth, non-textured base.

Ashby Bath Shortener

- Safety in the bath for shorter people
- Prevents slipping down
- Four suckers attach securely

This enables people who are shorter in height to feel secure in the bath, as they can rest their feet against something solid. Four large suckers attach the shortener to the end of the bath, to help prevent someone from slipping down. Suction pads are fixed to the base and sides of the bath. A hole is cut into the base allowing water to enter, and a breather hole under the handle allows air to escape, meaning that it doesn't interfere with filling or draining the bath. The Bath Shortener is only suitable for baths with a smooth, non-textured base.

Derby Tap Turners

- Suitable for both cross head and crystal taps
- Large colourful handle for easy identification
- Quick to fit, no tools needed

Standard household taps can be difficult to turn, especially for those with poor grip or arthritis. Derby Tap Turners can solve the problem, by providing a large textured handle which is easy to push, starting the flow of water. They can be used on capstan and crystal type taps, with no tools required. The screw-in handle grips the tap with a soft non-slip lining on the inside, providing the extra leverage needed to turn them with ease. Colour coded in red and blue enabling those with impaired eyesight to quickly identify the correct tap.

Tap Turners

Red Ashby Toilet Seat

- Three year guarantee
- One piece moulding for ease of cleaning
- Choice of brackets

Red and blue Ashby Raised Toilet Seats set the standard for ease of use, cleaning and durability. They are ideal for healthcare issue, as the one piece moulding can be completely immersed for cleaning, or sterilised in an autoclave.

The two Easyfit brackets are quickly secured onto the toilet bowl. They are adjustable by hand, making the seat easy to fit or remove.

A wide cut away at the front allows easy access for personal cleaning.

Ashby Raised Toilet Seats in red or blue are available in three heights; two, four and six inch (5, 10 and 15 cm).

High contrast products for Dementia – making life clearer

For people with Dementia related visual recognition issues, low contrast areas can become difficult to distinguish and recognise appropriately. This can result in anxiety, challenging behaviour and loss of dignity. Our solution is to use high contrast colour to make important things stand out.

Red Ashby Grab Rail

- High contrast colour
- Ribbed grip for safety
- Provides leverage and support

Plastic grab rails in contrasting red or blue colours to give easy visibility and recognition. The straight rail can be installed vertically or horizontally, for steadying or transfer. If the rail is mounted vertically it will assist in pulling up to standing, or if mounted horizontally it will assist in pushing up and for general mobility. Each rail has ribs and a light texture to provide extra grip even when wet and, unlike metal rails, it will be warm to the touch. It is recognised that grab rails are subject to strong movement, therefore it is essential that they are fitted according to the instructions.

Red Ashby Step Two

- High contrast colour for visibility
- Easier and safer bath access
- Two heights in one unit

The Red Ashby Step Two helps those with visual impairment to locate the step. This makes bathing easier and safer by reducing the danger of falling. The step has two heights, depending on which way it is used. One side gives a 4 inch (10cm) step, the other side gives a higher 6 inch (15cm) step. Choose the height which is closest to the base of the bath, to prevent over-reaching. The Ashby Step Two provides a large standing area for both feet, so the user can be steady before stepping over the side of the bath. The textured surface helps to reduce the risk of slipping.

Big John

- Attractive and comfortable
- 75% more seat area than standard
- Supports up to 60 stone (380 kg / 840lbs)

The Big John Toilet Seat gives much more comfort for anyone who finds a standard toilet seat uncomfortable. At 19 inches (50cm), it gives increased support and comfort without the need to buy a new toilet. It is also slightly higher than a standard seat, with a raise of 1.5 inches (3.8cm). Remove your existing seat and attach the Big John through the toilet pan as usual, using the two non-rust bolts included. It will fit to virtually every toilet. Made to a high standard with sturdy bumpers underneath to create a stable seat. Produced in a high gloss finish with a matching lid.

Big John Toilet Aid

- Combines the Big John seat with a frame
- 380kg (60 st/840lbs) weight limit to any toilet
- Provides two arm rests to make rising easier

Combines our large, comfortable Big John seat and a strong height adjustable frame. This provides a high maximum user weight of 380kg (60 st/840lbs). It features two arms each side of the user for stability. The frame is the same as the Grand Cosby, featuring a lowest seat height of just 18.7 inches (475mm) and a maximum of 22.4 inches (570mm). The four ferrules sit flat on the floor, providing a steady base, which can be permanently secured using the optional floor fixing kit, for additional stability if needed.

Big John

Grand Cosby

- A strong over-toilet seat and frame
- Comfortable and easy to clean
- Built-in arm rests for stability

Developed from the popular design of the Cosby Clip-On Commode, providing a higher maximum user weight of 250kg (39st/546lbs) and a 40% wider seat area. The seat height can be set as low as 17 inches (440mm), or it can be raised in five height increments of 1 inch (25mm), to a maximum height of 22.5 inches (575mm). Cranked legs ensure a steady base. If additional stability is needed, an optional floor fixing kit is also available (61235).

Cosby HD Bathboard

- Our strongest bathboard
- 47 stone (300kg/658lbs) weight limit
- Stable and comfortable

The Cosby Heavy Duty Bathboard is similar to the standard Cosby, but with a stronger board underneath – 33mm thick (1.3 inch) for extra strength. This gives a higher maximum user weight and extra confidence that the bathboard will provide ample support. To order a Cosby Heavy Duty Bathboard, please use part number 64075.
