**3D PROGRAM**  
FOR PLAYGROUNDS

# ONCE UPON A TIME...

---

**Children love to use their imagination and create their own adventures while they play. The Playtop range of 3D rubber animals and shapes delivers an exciting new playground experience.**

Not only does it enhance the look and feel of a facility but also creates a greater sense of adventure to feed children's imagination and make play even more fun!

## ADVENTURE PLAY

Children will love to fly to the clouds on the back of the Bee or fight off evil astride the Spider.

They can balance on the legs of the Octopus or have a rest on the belly of the Sleeping Farmer.

The size of the animals creates a three dimensional environment where they can be played on top of, at the side of or all around.

They can be conquered or used to hide behind.

The range is as adaptable as it is innovative.

---

## SHAPE UP

Made with bright, bold colours, the 40 different elements of the Playtop 3D range all comply with the European Safety Standard EN1176.

Every animal and shape is covered with a high quality rubber surface and all products are made 100% in the European Union.

The Playtop 3D range is perfect for helping children develop social skills, offering meeting and seating in one convenient place.

Choose from the original Classic range of animals and shapes or the new Mini range, ideal for younger children or where space is more limited.

# PUTTING THE ADVENTURE BACK INTO PLAY

## Play Value

All elements of the 3D range have been carefully designed to appeal to children, encouraging them to move, interact, imagine and have fun.

## Safety

Each animal and shape is covered with a soft and very durable rubber surface.

## Functional

Every figure is not only aesthetically pleasing but also mechanically strong, offering both play, seating and meeting opportunities.

## Diverse

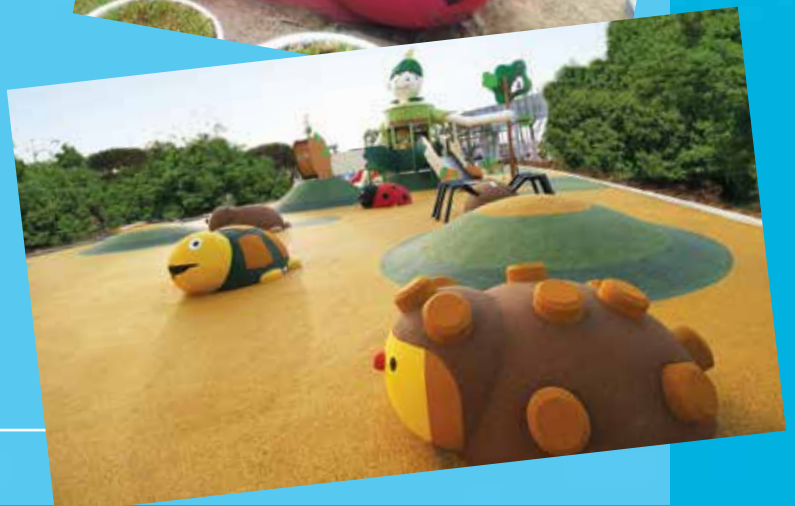

There are 40 different elements available ranging from hills to hedgehogs!

## Quality

Each element is made in Europe from high quality rubber granules.

## Flexible

The animals and shapes can be installed on a great variety of surfaces.
