THE CASTLE GROUP

don't be caught out by noise and vibration!

You may not even be aware that you have a noise or vibration problem. There are many ways in which you could be breaking the law or contravening an International Standard, not to mention the fact that you might be leaving yourself wide open for complaint and litigation. This could be true if you are in industry, consultancy, entertainment or local authority.

At Castle, it is our business to support and guide you through the sometimes complex process of solving such problems, be it by providing products and services or by helping you to set up policy and systems. In short, we will make your life easy and will not leave you to battle through on your own.

The ways in which we can help are numerous and are based on over 30 years of innovation. Response to customer feedback also ensures that we understand the real problems faced by you today.

Primarily covering Noise, Vibration and Audiometry we can provide:

- **Products to buy or rent**
- **Competent person training courses**
- **Noise & Vibration consultancy**
- **Medical screening services**
- **Instrument calibration and repair**
- **Web-based catalogue of health, safety & environment products**

SOLUTIONS FOR NOISE & VIBRATION ISSUES

Castle Consultancy

Castle experts are waiting to help you. Whether you are limited for time, in need of further expertise or just want some advice, we can assist. We have provided a wide range of services to many top companies for projects large and small. Noise and vibration risk assessments, noise control projects, environmental impact assessments, building acoustics, entertainment noise complaints, neighbour noise and traffic noise are just examples of areas where we can help you. We can also provide occupational health services and even physician referrals, and not just for Noise & Vibration.

Castle Consultancy can also provide expertise for many areas of Health, Safety and Environmental Monitoring and Control including, COSHH (Dust, Gas and Vapour Monitoring), Display Screen Equipment, Manual Handling, Air Quality Monitoring and Quarry Blast Monitoring to name just a few.

To talk to someone or simply request a brochure you can call now on: **+44 (0)1723 584250** or visit our web-site at: www.castleanswers.com

Castle training

Irrespective of the equipment you use, Castle's Training Courses, which are recognised by leading industry bodies, provide in-depth knowledge and a high level of hands-on practical experience. Each course is carefully designed to leave you 'ready-to-go' upon your return to work. Tutored by highly experienced professionals, most courses lead to 'Competent Person Status'. Courses are available throughout the year in top class locations:

- **Noise at Work**
- **Hand Arm and whole body Vibration**
- **Noise in the Environment**
- **Noise & Vibration control**
- **Industrial Audiometry**
- **Building Acoustics**

or visit our web-site at www.castle-training.com

castle premier service and calibration

Measurement instrumentation must be regularly calibrated to a traceable standard and this is certainly true for Noise and Vibration equipment. At Castle, our team of highly trained technical staff can service and calibrate almost any make and model of Noise and Vibration Meter or Audiometer. The Castle 'Premier Service' includes menu pricing and a normal turnaround time within 5 days. What is more, we will evaluate any instrument and return it for free if you do not want to proceed.

For a quotation just call us on: **+44 (0)1723 584250**
or visit our web-site at: www.castle-care.com

There are a number of reasons why rental may be the solution for you. You may only have a one-off use, a special contract, a limited budget or a need for supplementary products. In any case, our flexible booking system, next day a.m. delivery and open-pricing mean that you can address any of these issues without delay. For fixed contracts, as in construction, Castle Rent is also a tax efficient way to 'own' equipment. Finally, for peace of mind, what better way is there to try a product before deciding to buy it?

NEW REGULATIONS - are you ready?

The Control of Vibration at Work regulations 2005 and the Control of Noise at Work Regulations 2005 are based on the European Physical Agents Directive and bring in a raft of new measures along with greatly reduced limits of exposure. If you are not sure what this means for you, then contact us to find out more.

Call us on: **+44 (0)1723 584250**
to find out more or visit: www.castlegroup.co.uk

As a commitment to providing a first class service, we can offer many essential products for Health, Safety & Environmental applications, from Anemometers for wind speed and light meters, to Personal Protective Equipment (PPE) and everything in-between, the Castle Essentials web-site could be a very useful resource indeed.

a revolution in sound design

Castle Group have a proud tradition of bringing technology, functionality and usability to the world of noise and vibration measurement. The ALL NEW Pro-DX Vocis sound level meter is certainly no exception. This new instrument offers such features as real-time frequency measurement, up to 512KB of memory, 19 simultaneous measurements, 2 channels and even a weatherproof casing!

The new Vocis adds to an already impressive line-up of products covering a huge range of applications. If you have any of these measurement issues to deal with, then we can help.

- Noise and Vibration in Health and Safety
- Noise and Vibration in the Environment
- Entertainment Noise Control
- Vehicle Noise Measurement
- Vibration in Engineering
- Building Acoustics
- Audiometric Testing

human vibration the **NEW** Excieo meter

Another BRAND NEW product from Castle is the PRO-DX Excieo Human Vibration Meter. Literally taking it's meaning from the Latin 'to excite', Excieo certainly is an exciting development. Combining the power of cutting-edge technology with Castle's approach to ease-of-use, Excieo is certainly set to become another market-leader from Castle.

Castle sound level meters range from powerful to pocket sized. The success of the 'pocket' meters in industry speaks for itself whereas the more powerful 'professional' meters are used in a wide variety of more advanced applications.

As an example of Castle's approach to functionality. This range of products are pocket sized to be of maximum use wherever you are. There is even one for Hand Arm Vibration.

SOUND EXCHANGE

Castle can offer you a generous part exchange allowance when replacing old instrumentation with a new Castle system. Most Castle products are also upgradeable so you can move up to a higher specification model when budgets will allow.

CASTLE WARRANTY

With the Castle warranty passport scheme you can have peace of mind for 4 years at no additional cost. This combined with Repair and Calibration under the Castle Care premier service pledge means no more after-sales worries.

SOUND ADVICE

Castle are authorised distributors of HSE legislation booklets, many of which are relevant to your working environment, with further information on your legal responsibilities regarding noise and vibration, and details of a wide range of practical noise and vibration solutions. We can also supply, at cover price, British and International Standards.

SOUND FINANCE

There are many ways to work to a budget with Castle as we provide financial options such as: Monthly payments, Credit/Debit cards, Flexible term rental. We even take cash.
