Brackets in Detail

Bookend Brackets

Bookend brackets for use with laminated shelves are manufactured in anodised aluminium or powder coated aluminium, they are supplied in pairs to suit 325mm or 250mm deep shelves

- 30.030** Bookend brackets 250mm satin anodised - pair
- 30.032** Bookend brackets 325mm satin anodised - pair
- 30.041** Bookend brackets 250mm white powder coated - pair
- 30.042** Bookend brackets 325mm white powder coated - pair

Extended Bookend Brackets

Extended bookend brackets are engineered for use with laminate shelving that supports lever arch files or heavy books. They are available in anodised aluminium or white powder coated aluminium for 325 or 250mm deep shelves.

- 30.007** Extended bookend brackets 250mm satin anodised - pair
- 30.008** Extended bookend brackets 325mm satin anodised - pair
- 30.005** Extended bookend brackets 250mm white powder coated - pair
- 30.006** Extended bookend brackets 325mm white powder coated - pair

Pass-Over Brackets

Pass-over brackets are used to support continuous shelving and are supplied with a single or double flange. The double flanged bracket is used to support two joining sections of shelving material. Pass-over brackets will sustain shelf depths of 150mm, 250mm, 300mm and 400mm.

The spacing between brackets is determined by the permissible span of the shelving material to be used.

Alternatively it is at 600mm or at 750mm between the slotted uprights if other Toprail components are being used.

- 30.031** Pass-over bracket for 150mm shelves
- 30.035** Double flange bracket for 150mm shelves
- 30.033** Pass-over bracket for 250mm shelves
- 30.034** Double flange bracket for 250mm shelves
- 30.036** Pass-over bracket for 300mm shelves
- 30.038** Double flange bracket for 300mm shelves
- 30.040** Pass-over bracket for 400mm shelves
- 30.043** Double flange bracket for 400mm shelves

Heavy-Duty Brackets

Heavy-duty brackets are designed with a unique clamping device to hold the bracket around the slotted upright as well as latch into the actual slot to create an extremely strong support bracket. The heavy-duty bracket is manufactured in two standard lengths to suit worktops or shelving in 500mm or 800mm depths. We recommend that the adjustable leg support, which attaches to the heavy duty brackets, is utilised when 800mm deep worktops are used.

- 30.039** Heavy-duty brackets 500mm pair
- 30.047** Heavy-duty brackets 650mm pair
- 30.048** Adjustable leg support- supplied in pairs
