

**I am truly amazed we returned a sensor back to live link which we purchased in 2010 that required a service, and it still worked with the original batteries in place, the sensors we now have in place have the movement beam and have been a real plus for us rather than the sensor mat, Tom at Live Link has supported this service since 2006 when he became our provider of our nurse call systems. Well done to Tom and everyone at Live Link and many thanks.**
