# The ASTRAL Collection for you

## Save money fast

### Technology

- Our technical expertise and knowledge of the global market enables you to purchase with confidence replacement parts for your non Wheelabrator blast equipment.
- As an OEM provider, with over 100 years of knowledge and over 50,000 shot blast machines in the field we fully understand shot blast technology and with such knowledge comes assurance to support your decision to purchase wear parts from the industry's leading technology provider.

### Availability

- The ASTRAL Collection forms part of the largest globally available inventory of replacement parts for shot blast equipment.
- Such availability allows you to free your working capital by reducing your own levels of inventory and having the confidence that emergency requirements can be with satisfied and expensive downtime minimised.

### Price

- The ASTRAL Collection from Wheelabrator Plus enables you to obtain your replacement parts for non Wheelabrator blast equipment at the most competitive prices possible.

## The ASTRAL Collection Plus

In addition to the ASTRAL Collection, looking beyond your current technology, Wheelabrator Plus is also able to provide you with service, maintenance and advancements in technology.

### Maintenance and service

- Wheelabrator Plus provides equipment service and maintenance packages, developed to meet your specific needs and ensure you experience minimum downtime and maximum productivity.

### Equipment modernisation and upgrades

- Our equipment modernisation programmes enable you to upgrade your current shot blast equipment, providing you with all the advantages of a new machine at a lower investment.
- By utilising the latest developments in technology we enable you to improve your productivity and thereby reduce the cost of each part you produce.

- If you are planning to relocate equipment, Wheelabrator Plus can safely and quickly move, reassemble and recommission your shot blast surface preparation equipment to its new location, reducing your downtime and ensuring that you are back in production as quickly as possible.

### Training

- Training can be provided for your convenience on-site or at one of our technology centres. Training programmes help participants understand the principles and interrelationships of blast surface preparation equipment components, how to apply appropriate preventative maintenance practices and learn how to increase productivity whilst controlling costs.
- Run by our technology specialists, training programmes allow Wheelabrator Plus to communicate our wealth of technical knowledge and experience to you and your staff.
