SmartLine Blastrooms

Technical specifications

The principle of SmartLine blastrooms: Install, connect, blast.

Blastrooms are the preferred solution for many different applications.

New SmartLine blastrooms are compact, robust and economical machines suitable for a wide range of applications and abrasive media.

The integral air filtration and dust collection system incorporated as standard equipment, allows independent installation without further ducting.

Advantages at a glance

- Compact, completely self contained blastroom
- Quick easy installation
- Pitless installation possible
- No further exhaust or air ducting required
- Robust construction for long service life
- Easy access to areas requiring maintenance
