

## COMPACT

Quick retrofit for keyed cam locks commonly supplied on a wide range of lockers, cabinets and cupboards. Easy to fit; taking just a few minutes to remove the existing cam lock, make an additional top fixing and fit the KL1000. For a new install just make a hole for the spindle and top fixing, simple. Access control without the need for keys.

Simple keyless access

## TOUGH

All the benefits of the KL1000 but tougher and more robust for challenging environments. With additional programming features, stainless steel buttons, dual fixing points and improved number of operations, the KL1200 provides enhanced benefits to facilities managers looking to simplify access control without the need for keys. Quick, tough and cost effective.

No more lost keys

COMING SOON FOR 2013

## VERSATILE

KL1500 is the latest addition to the KitLock range. Combines all the features of the KL1000 and KL1200 plus a lot more! With a 'real time' clock the lock can now be programmed to open at a specific time of day, can have multiple user codes entered, be programmed so two codes are needed to open the lock and can be fitted in any orientation due to the patented keypad design. Also the keypad can be replaced with iButton for access control by wristband. Looks stylish too!
