

TOSA 125E

AUTOMATIC PALLET STRETCH WRAPPING MACHINE WITH ROTATING RING EQUIPPED WITH WATERTIGHT TOP SHEET DISPENSER

This machine, with rotating film-roll, allows to obtain a steady and compact packing of all sorts of palletized load by a differentiated wrapping on products of sundry nature. An overall packing (five sides) is guaranteed for all sorts of palletized products by the waterproof top sheet dispenser integrated in the machine. Such a wrapping provides an excellent protection against the action of the weather. The possibility of carrying out different wrapping cycles is the main feature of this machine. The wrapping program, in addition to the complete cycle, allows to carry out a downward cycle only, an upward cycle only, a wrapping of the top or the bottom of the pallet only and a waterproof cycle. This machine can be installed on any existing packing line and it perfectly meets high production needs. It is complete with top pneumatic presser, powered pre-stretch assembly, film hooking and cutting unit, film sealing unit, boundary safety-guards, control board with PLC and different adjusting and control units.

TOSA 125E

Characteristics:

Technical features:

- Film-roll up-down stroke speed variable by Inverter
- Stretchable film tension adjustment
- Photocell for automatic pallet height detection
- Visual display for fault signalling and cycles times setting

This machine can be equipped with different optional units:

- Power roller conveyor placed inside the wrapping machine
- Power roller conveyors placed either at the entry or at the exit points
- Automatic film-roll change device

Technical Data:

Maximum pallet dimension 1000 x 1200 x 2000 H mm

Power supply V.380+N/50 Hz

Installed power Kw 6

Air consumption 140 NI/min

Output 60/90 pallet/hour

Self-adhesive stretch film Roll max. Diam. 250 mm

All the technical specifications are subject to change without notice.
