

London Electronics Ltd

Designers & manufacturers of measurement and display instrumentation

Measurement and Control Instrumentation

Anything that changes in your process will affect the final quality of your product. These instruments help you to reliably maintain the same high quality, batch after batch ...

Production-line monitoring displays

Everyone can see their up-to-date shift figures. Helps you to keep lines running at full performance, boosts team spirit, raises efficiency ...

Public Relations message displays

Be sure to tell visitors and staff about your company's important news and achievements with these large format message displays ...

Helping companies to monitor, control and display important variables

How do you benefit by choosing London Electronics products?

All products are User-Friendly. This makes your life easier and saves your valuable time! Plain-English manuals tell you all you need to know, in a clear, logical format.

Plus, there is an big range of products to choose from, so you only need to source from one supplier for all your instrumentation needs. Common styling, setup and ease of use.

Commissioning is easy too. Many displays have remote programmer setup, so you can change scaling and other settings from the safety and comfort of ground level.

London large displays are attractive, stylish and are made for use in harsh atmospheres.

Here are a few typical large displays, used by companies all over the world to clearly display important information.

Choose from a wide range of digit sizes to suit the viewing distance you need.

Input signals can come direct from discrete sensors such as proximity sensors, tachos, PLCs, thermocouples, loadcells etc.

Or, simply use the display as a large remote screen and send your existing PLC or DCS data to it with RS485, profibus or Ethernet.

You can specify single or multi-line displays, which contain any combination you wish, of the following functions ...

- Weight
- Temperature
- Humidity
- Rate/Speed
- Total
- Target
- Time
- Serial data slaves
- Efficiency
- Variable Text
- Any physical variable ...

Products to help improve quality and control in your plant...

London Electronics designs and manufactures one of the widest ranges of user-friendly process monitoring and control instruments.

Anything that can be physically measured has a London Electronics instrument designed specially to display or control that variable.

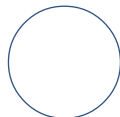

- Digital panel meters
- Bargraph displays
- Signal transmitters
- Large displays
- Message displays
- Signal selector switches
- IP67 / NEMA4X Splashproof covers
- Custom special instruments.

Technical CD with complete set of operating manuals and datasheets.

We're here to help. If you have any questions or need more information, please feel welcome to contact us ...

help@london-electronics.com

We design and manufacture standard and custom-special products to help you measure, control and display any physical variable, for a wide range of industries. Products include:-

- Large digital production displays for Weight, Speed, Target, Total, Time etc
- Large message displays for fault identification and correction
- Panel mounting speed, weight, humidity, temperature and total displays
- Panel mounting temperature, pressure, flow, draw and tension displays
- Bargraph displays and controllers in vertical and horizontal format
- Signal transmitters, isolators, splitters, conditioners and alarm modules
- 'Days since last accident' displays, site traffic speed displays
- Elapsed timers to show machine downtime, maintenance warnings etc.
- Message displays to show important news, warnings, motivational comments etc.
- Customised special displays to suit your exact needs
