

## **PermaPlant 'How To' Guide**

PermaPlant is the resin bound aggregate surfacing product which adds a unique dimension to pot plants. Think of it as a miniature version of our high quality resin bound tree pits. The PermaPlant is permeable so there are no changes to watering, it is available in a range of colours so you can use it to compliment the rest of the garden and it is easy to install. This product is perfect for people that want to create something unique in their garden and are unhappy with the look of their tired pot plants. **Check out this video to learn how easy it is to install PermaPlant.**
