SHELTER & SHADE

Weatherproof Shade Sails

Overlapping Triangle Shade Sail (5201)

Our Weatherproof Shade Sails are constructed from a specially developed, heavy duty material which provides up to 99% protection from harmful UV rays and reduce the temperature in the shaded area by up to 32%. The Weatherproof range is shower-proof, able to withstand winds of up to 110mph and a snow loading of 22kg per m², as well as meeting local council and H&S specifications.

Weatherproof Shade Sails can be arranged in many different ways to create light and airy spaces beneath. They can easily be extended over time to suit your needs and budgets. The sails are available in over 20 different vibrant colours, are easy to clean and resistant to mould and mildew.

For bespoke configurations please contact us to discuss your needs.

Materials: Galvanised steel posts
Assembly: Professional installation included
 Optional padded post protectors and anti-climb cones available.

Hyperbolic Square Shade Sail (5206)

The Hyperbolic Square Shade Sails provide effective shading and form a barrier against harmful UV rays. They are made from a porous material which prevents temperature build up underneath.

They are available in 5m to 8m and combinations can be designed to cover large areas with a minimum amount of posts.

Padded post protectors are available in four different colours as an additional item.

Dimensions available: 5m x 5m
 6m x 6m, 7m x 7m, 8m x 8m

Triangle Shade Sail (5202)

The Triangle Shade Sails, much like the Hyperbolic Square Shade Sails, also provide effective shading and form a barrier against harmful UV rays.

They are available in 6m to 9m and combinations can be designed to cover large areas with a minimum amount of posts or to overlap to create a design feature.

Padded post protectors are available in four different colours as an additional item.

Dimensions available:
 6m x 6m x 6m,
 7m x 7m x 7m, 8m x 8m x 8m,
 9m x 9m x 9m

Waterproof Shade Sails

Waterproof Shade Sails are a great way to create a waterproof, shaded outdoor area, that can be used whatever the weather all through the year.

Our Waterproof Shade Sails provide a practical solution where the utility of sun protection and shade are required to accommodate varying weather conditions. They allow large areas to be covered and sheltered with the minimum amount of posts, and are able to withstand winds of up to 110mph.

For bespoke configurations please contact us to discuss your requirements.

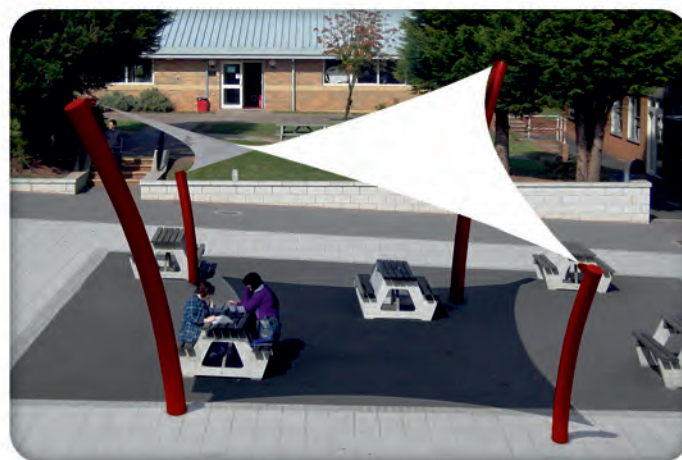

Materials: Galvanised steel posts
Assembly: Professional installation included
Optional padded post protectors and anti-climb cones available.

Hyperbolic Style Shade Sail (5208)

Dimensions available: 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m

Sydney Shade Sail (5407)

The beautifully curved posts add a modern architectural style to the design.

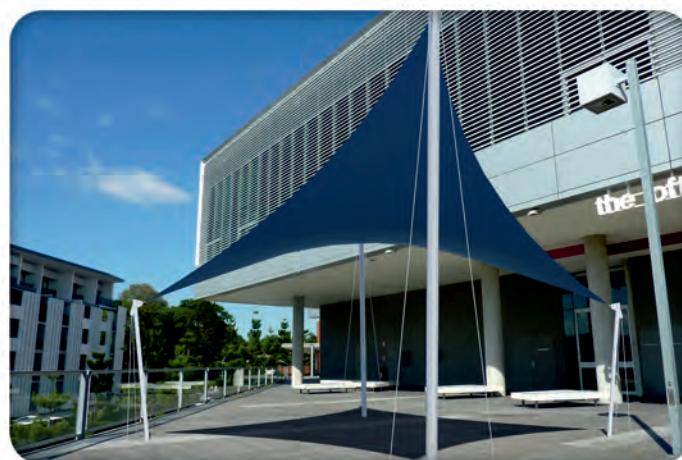

Dimensions available: 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m

Cairns Shade Sail (5408)

Dimensions available: 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m

Albany Shade Sail (5409)

Their angled posts provide an architectural interest to the design

Dimensions available: 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m

Waterproof Tension Structures

Umbrella Tension Structure (5301)

Waterproof Tension Structures provide the perfect solution as an outdoor classroom or waiting area, while giving full protection from the rain and the sun's UV rays. Available in a wide range of sizes they are designed and manufactured using high quality materials to give strength, elegance and durability in all weathers. Their smooth curves are engineered to withstand winds of up to 110mph.

The Umbrella Tension Structure creates an ideal outdoor classroom or waiting area, with its single central column providing maximum space in the shelter. It is available with a curved or linear edge to suit all sites.

The linear edged umbrellas can be linked together or butted up against a wall. It is available in a wide range of striking colours.

Dimensions available: **Standard Curved Edge:** 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m **Standard Linear Edge:** 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m

Materials: Waterproof 'Mehler' PVC fabric, galvanised and powder coated frames, stainless steel edge cable

Assembly: Professional installation included

Guttering can be fitted to Linear edged structures. Drainage spouts can be located in a position of your choice, downpipes may only be fitted where there is an adjacent wall to fix to.

Cantilever Tension Structure (5403)

The Cantilever Tension Structure provides the perfect solution for sheltering smaller play areas or quiet seating areas. This structure allows all of the sheltered area to be utilised, without any obstruction from the supporting pole. It is available in a wide range of striking colours, to brighten up an area or match your school colours.

We also offer an additional range of up to 50 bespoke colours, for details on these and larger configurations of structures please contact us to discuss your requirements.

Dimensions available: **Standard:** 4m x 4m, 5m x 5m, 6m x 6m **Linear:** 4m x 4m, 5m x 5m, 6m x 6m

Materials: Waterproof 'Mehler' PVC fabric, galvanised and powder coated frames

Assembly: Professional installation included

Guttering can be fitted to Linear edged structures. Drainage spouts can be located in a position of your choice, downpipes may only be fitted where there is an adjacent wall to fix to.

Gazebo Tension Structure (5402)

The Gazebo Tension Structure is a large structure suitable for more than just an external classroom, you could shelter a whole school during sports day! It is available in a wide range of striking colours, and can be linked together with other Gazebo structures or butted up against a wall.

Also available is our Barrel Gazebo, with its smooth curves it forms an ideal, aesthetically pleasing entrance way or waiting area. We also offer an additional range of up to 50 bespoke colours, for details on these and larger configurations of structures please contact us to discuss your requirements.

Barrel Gazebo (5404)

Dimensions available: **Linear:** 4m x 4m, 5m x 5m, 6m x 6m, 7m x 7m, 8m x 8m **Barrel Gazebo:** 3m x 3m, 6m x 3m

Materials: Waterproof 'Mehler' PVC fabric, galvanised and powder coated frames

Assembly: Professional installation included

Guttering can be fitted and downpipes attached to any leg.

Ulura Double Conic Tension Structure (5410/2)

The Conic Tension Structure is a striking, aesthetically pleasing structure that will form a dramatic focal point. It is a large structure, available as a double or triple unit depending on the amount of shelter required, and comes in a range of different colours.

For details on these and larger configurations of structures please contact us to discuss your requirements.

Dimensions available: Double: 12m x 7m Triple: 18m x 7m

Materials: Waterproof 'Mehler' PVC fabric, galvanised and powder coated frames

Assembly: Professional installation included

Ulura Triple Conic Structure (5410/3)

Mackay Tension Structure (5406)

The Mackay Tension Structure is an ideal entrance or walkway shelter, that comes in a range of vibrant colours.

With just a single post for each structure there's plenty of space to move around or position picnic tables. The Barrel Vaulted style gives these structures a real feel of space beneath.

They can be configured singly or connected together to form larger structures. For details on these and possible alternative configurations please contact us to discuss your requirements.

Dimensions available: Standard: 4m x 4m

Materials: Waterproof 'Mehler' PVC fabric, galvanised and powder coated frames

Assembly: Professional installation included

Double Gazebo

Combine two Gazebos together to create an extra large shelter.

Addition of Other Products

Why not incorporate Chalkboards or Dry Wipe Boards to create an outdoor teaching area.

Custom Designs (5503)

Combine the different options to create a truly personal shelter. Our gazebos can be customised to suit a wide range of needs, call us to discuss your requirements and we will endeavour to find the best solution for you.

Octagonal Gazebo (5504)

Our eight sided gazebo allows for more benches. Available at a standard 5m, please call to discuss other size requirements.

Inside/Outside Classrooms

Polycarbonate Lean-to (5801)

Our Polycarbonate Shelters are a great way to extend the classroom outside, providing a light and airy environment to work and play. These bespoke shelters are ideal for under cover play areas, covered walkways or parent waiting shelters. They are custom designed to fit your specific area and requirements.

The Polycarbonate roof blocks virtually all UV radiation whilst allowing light through, preventing dark spaces underneath. Completely water proof when combined with guttering, this system can create usable spaces for outdoor learning and play all year round. The translucent sheet material has good impact resistance, essential for use in areas which are close to ball games.

Dimensions: Site specific

Materials: Pressure treated timber, zinc plated fixings, polycarbonate

Assembly: Professional installation included

Timber Structure (SHE001)

Our Timber structures can be built to virtually any size to fit your outdoor space and fulfill your individual requirements.

Why not incorporate our Giant Post Mounted Chalkboard and Dry Wipe Board into your Inside/Outside classroom?

Dimensions: Site specific

Materials: Pressure treated timber, zinc plated fixings

Assembly: Professional installation included

Large Timber Structure (SHE001)

The Large Timber Structure can be built to any size or shape to fit your outdoor space.

Any of our outdoor furniture range can be included to make this area more versatile.

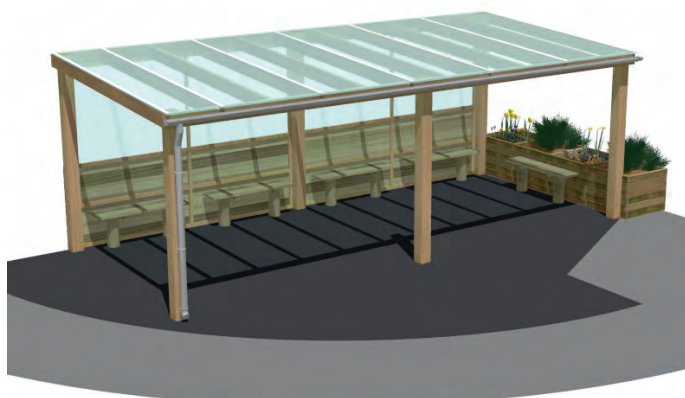

Dimensions: Site specific

Materials: Pressure treated timber, zinc plated fixings

Assembly: Professional installation included

Timber Shelters

Freestanding Polycarbonate Shelter (SHE01)

A roofing option that blocks virtually all UV radiation whilst allowing light through, preventing dark spaces underneath. Completely water proof when combined with guttering, this system can create usable spaces for outdoor learning and bicycle shelters all year round.

The shelter can be combined with seating, planters, activities or benches to provide any type of covered space you require.

The translucent sheet material has good impact resistance, essential for use in areas which are close to ball games.

Dimensions: Site specific

Materials: Pressure treated timber, polycarbonate

Assembly: Professional installation included

Rectangular Shelter (5802)

Large Rectangular Shelter fitted with bench seats and half height walls.

Purpose built for schools, designed as a playtime shelter, parents' waiting shelter or as an 'open air' classroom. The structure can accommodate approximately 20 - 25 children. Good for providing cover during wet play.

Strong polycarbonate windows, or full timber sides can also be added to any of our timber shelters.

Rectangular Shelter with Windows (SHE01)

Dimensions: Site specific

Materials: Pressure treated timber, polycarbonate

Assembly: Professional installation included

Parent & Cycle Shelter (SHE01)

Our custom designed Parent & Cycle Shelter can be built to any size to fit your specification. It is ideal for parents to shelter from the elements whilst waiting for their children.

The example shown will house eight bikes and seat approximately eight adults.

Parent or Cycle Shelter (SHE01)

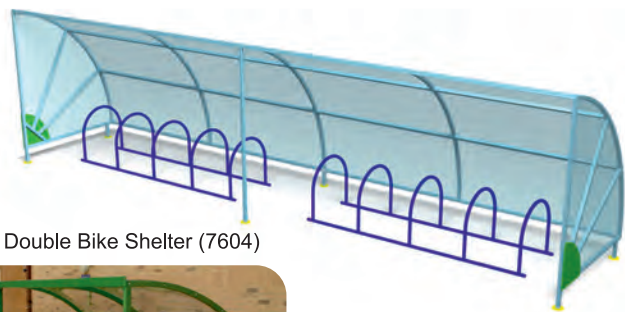

Dimensions: Site specific

Materials: Pressure treated timber, polycarbonate

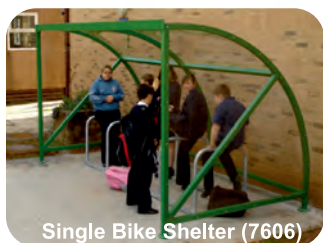

Assembly: Professional installation included

Cycle Shelters

Single/ Double Bike Shelter

Double Bike Shelter (7604)

Single Bike Shelter (7606)

Dimensions: W: 4.00m/ 8.00m D: 3.00m H: 2.15m
Materials: Transparent PET cladding, steelwork zinc primed & polyester powder coated
Assembly: Professional installation included

Bike Compound (7605)

Dimensions: W: 4.00m D: 5.50m H: 2.15m
Materials: Transparent PET cladding, steelwork zinc primed & polyester powder coated
Assembly: Professional installation included

Traditional Cycle Shelter

Perforated Flat Steel Panels (7607)

Our traditional Cycle Shelter provides covered and secure parking for bikes. The side panels that provide shelter and screening are available in either galvanised corrugated steel, or perforated flat steel. The corrugated roof overhangs the shelter walls at the front to provide protection for bike saddles from rain. For units mounted close to a wall, the back can be specified as open.

Long runs of cycle parking shelters can be created by adding extended units.

Corrugated Steel (7608)

Dimensions: W: 2.45m/ 3.06m D: 1.90m H: 2.15m
Materials: Galvanised corrugated steel, perforated flat powder coated steel panels, tubular steel sections
Assembly: Assembly & groundworks required
 Other frame colours available- please call for details

Cycle Racks

Loop Rack (7650)

Bike Loops (7651)
