

NEW

SPRINT

Advanced X-Ray processing for intra-oral film.

**Low
Temperature
and Power
indicators**

High Quality X-Ray Film Processing

The Sprint is the smallest and most basic x-ray film processor in our range. Wall mountable or free standing and incorporating the daylight loader it can sit almost anywhere in the dental office.

Almost silent in operation it delivers x-ray film rapidly but only from dry to wet. The film will need to be left to dry before storage. A special fast cycle will deliver the film for endo purposes in as little as 60 seconds non-archivable, Standard cycle 120 seconds.

The standard Sprint comes with temperature control. The economy version has no heating but uses a "time temperature" feedback system which adjusts the speed of processing to the temperature of the chemistry.

The Sprint has auto start at feeding in the film. Also audible signals on film entry and film exit.

Sprint is ideal for the low volume user and a simple-to-use back-up unit for the digital office when a high quality diagnostic x-ray film is required.

**Simple, ultra-compact wall-mountable
automatic daylight processor for
intra-oral x-ray films**

**Radiographs viewable wet - only 2
minutes from loading**

**Velopex Sprint is delivered as a
standard daylight processor**

Dimensions:

Width : 387 mm/15.25"

Height: 450 mm/17.75"

Depth: 225 mm/8.75"

Tank Capacity: 1.4 litres/ 1.5 quarts

Voltage: 100-120V, 200-240V (50/60Hz)

Deluxe Version : Automatic temperature control

Standard Version : Time-temperature auto
adjustment

Complies with:

IEC 1010-1:1990 + A2:95

EN 610610-1:1990 + A2:95
