## Which one?

**Deep Bronze** - SunSpa's darkest tan. Deep Bronze is 8% DHA which is the highest percentage the skin can absorb. The solution has a unique alcohol free formulation that delivers perfect tans every time and dries within seconds!

**Natural Bronze** - A natural flawless and convincing colour. This solution is 6% DHA and is our most popular colour for an all year round flawless glow.

**SunSmoothie** - a revolutionary "Micro emulsion" which works in a fundamentally different way to any other tanning solution. Excellent for dry or mature skins.

## Retail

SunSpa's Tan-in-a-Can is the world's first 'no-blend' sunless tanning aerosol. This unique aerosol replicates the fine mist achieved by an airbrush, which means no blending is required. With just a few flowing sweeps Tan-in-a-Can gives the same perfect results as a professionally applied tan.

Tan-in-a-Can comes in two sizes, regular and Chic which is a smaller handbag sized can. SunSpa's Golden Glimmer and Silver Shimmer are also extremely popular with customers as they leave a fine mist of shimmer on the skin to highlight and define areas, perfect after a tan! We also sell combination party packs - call for details.
