

Powering Water

UK Price List October 2019

(Issue 1)

Our brands Suitable solutions

Our brands are specifically designed and developed to provide a comprehensive range of solutions for applications in both domestic and commercial markets. To help you choose the correct product read our summary of our brands and their main applications and for further detail, including full technical specifications, please visit our website: www.stuart-turner.co.uk

AQUABOOST

Standard and bespoke booster sets

Why Aquaboost?

Aquaboost offers a comprehensive range of standard water boosting solutions for larger domestic, commercial and industrial applications. Aquaboost also offers bespoke packaged pump systems designed and built specifically to suit individual project requirements. The possibilities are endless and our highly experienced specification team can help you find the right solution.

MAINSBOOST

Mains water pressure boosting solutions

Why Mainsboost?

Solving the problem of poor mains water performance! Mainsboost Water Performance Systems are specifically designed to stabilise water pressure and dramatically improve water flow rates to all direct on mains appliances. They deliver improved performance from unvented water cylinders, combination boilers and high performance shower heads, allowing multiple outlets to run simultaneously.

MONSOON

Whole house, bathroom and shower pumps

Why Monsoon?

Monsoon is the benchmark for high performing, quality brass pumps available on the market. This comprehensive range is specifically designed to meet the demands of a host of domestic and light commercial applications in vented systems, from a single tap and shower to a complete bathroom or the whole property.

SHOWERMATE

Bathroom and shower pumps

Why Showermate?

Showermate offers a range of high quality plastic pumps providing a cost effective solution to boost the performance of a single tap, shower or complete bathroom. Showermate pumps are suitable for water pressure and flow boosting applications within properties featuring a vented plumbing system.

WASTEFL0

Waste water removal

Why Wasteflo?

Our Wasteflo range offers a variety of products to simply and efficiently remove waste water from your home or commercial building, allowing you to create a bathroom, wet room, kitchen or utility room anywhere a connection using gravity to the main soil/waste pipe is not possible.

STUART

Pressurisation units, heating products, water conditioners and pumps

Why Stuart?

The Stuart brand consists of a range of pressurisation units, heating related products, water conditioners and a diverse range of water pumps, along with associated accessories and controls. Every product within the Stuart range has been designed and developed to provide high levels of performance and reliability.

Please note: Updated and extended product range. New product descriptions and part numbers

Trusted solutions for every application

Our product knowledge and manufacturing capability allows us to offer **bespoke** packaged pump systems designed and built to individual customer and project requirements. Stuart Turner booster sets utilise premium quality vertical or horizontal multistage pumps controlled by our own designed and engineered, energy efficient digital pump controllers.

For example:

Case Study St Anne's Quarter, Norwich

Sector

Residential

Project summary

St Anne's Quarter is a stylish new residential and retail development in the heart of Norwich and offers a selection of studios, apartments and penthouses.

The challenge

To meet the water supply demands required by this completely new development the design of two bespoke booster sets and water storage solutions were required to be delivered in a phased development project.

The solution

Based on a detailed requirements analysis, the development's needs were met by two independent booster sets, each comprising three or four multi-stage pumps and a Stuart Turner PCU600 control system. Each set is supplied from a 24m³ or 42m³ sectional cold water storage tank and Stuart CM water conditioner.

Client testimonial

"The two booster systems were designed to meet the consultant's specifications which included the provision of high performance catalytic-magnetic water conditioners."

For further information or If you require a bespoke packaged pump system, designed and built to individual customer and project requirements Telephone: **TechAssist +44 (0) 800 31 969 80** e-mail info@stuart-turner.co.uk or visit the support section of the Stuart Turner website to find our specialist in your area. www.stuart-turner.co.uk
