

## Cash Till Processing

Easy as...

1

Enter ID and password and follow the on-screen prompts.

2

The coins are weighed by denomination (less the weight of the till cup). The JetWeigh quickly computes a total and moves on to the next denomination.

3

The JetScan currency scanner quickly counts the mixed notes (no presorting required) and transfers the count to the JetWeigh, providing one concise batch report.

### Benefits of the Cummins JetWeigh® Retail Cash Settlement System

#### • Dramatically Reduce Cash Drawer Processing Time

With the JetWeigh® system, cash drawers are counted in a fraction of the time it takes to count a drawer by hand. Unlike competitive equipment, the coins and notes can be counted simultaneously.

#### • Increase Count Accuracy

The accuracy of Cummins coin and note processing equipment is time-tested and proven in hundreds of thousands of installations.

#### • Improve Loss Prevention

The combination of equipment accuracy, reduced time that employees have cash drawers open, and the unique identification printed out on the reconciliation receipt provides a high level of accountability.

#### • Reduce Deposit Drop Time

Up to 10 customized media types (checks, coupons, gift cards, credit cards, etc.) can easily be entered, making quick work of deposit drops.

#### • Reduce Coin Deposit Fees

Coin is recycled, saving on fees for coin deposits and rolled coin purchases.

#### • Multiple Currencies and Languages

A variety of currencies and languages are currently included. Contact your Cummins representative for your particular application.

#### • Flexible Design

The JetWeigh can be connected to a number of Cummins currency processing products, including the JetDetect® and Universal JetCount®.

DEPOSIT MEDIA	359.18
DEPOSIT TOTAL	1148.21

Each printout allows up to 6 customized label fields, providing specific detail on the deposit. For example: record detail on the cashier, drawer location, shift, and more.

Once a drawer is processed, the JetWeigh system can automatically print up to 9 copies of the detailed report. See an example of the batch report (left).

Up to 10 customized media types can be entered. Choose the terminology that best fits your business.

The JetWeigh features software that walks the operator through each drawer balancing procedure.

# JetWeigh®

## Retail Cash Settlement System

The JetWeigh was specifically designed to fit into small cash rooms, typically found at retail locations. The cabinet is just 33cm x 33cm x 13cm.

### Specifications\*

#### Universal JetScan™ Currency Scanner

**Speed:** Up to 1,200 notes per minute

**Accuracy:** 99.99+%

**Top Hopper Capacity:** 300 circulated notes

**Stacker Capacity:** 150 circulated notes

**Dimensions:** 27cm W x 30cm D x 28cm H

**Weight:** 6.8kg

#### JetWeigh®

**Dimensions:** 33cm W x 33cm D x 13cm H

**Weight:** 6.6kg

#### Power:

AC input voltage is 100-240V. Frequency is 50/60 Hz. Customer must provide a single-phase, dedicated power line that meets the machine's power rating(s). Use a properly grounded circuit breaker in compliance with local electrical code. Power-adaptor-output rating: 8.6-9.4V DC, 4.0A (UL, ITE listed, Class 2 power supply). Power disruptions and fluctuations causing input voltage other than that listed in the power requirements can lead to improper operation of this device, damage to electrical components, and failure. Such occurrences are not covered under machine warranty or preventative maintenance agreement for this device. Power conditioning/stabilizing devices are available for purchase from Cummins-Allison Corp.

For even greater productivity the JetWeigh can also be used with the Cummins two-pocket JetScan. (requires cabinet extension)

Till cups are available for purchase from Cummins-Allison Corp. Cups are inserted into cash-till coin compartments, allowing each coin denomination to be removed with ease for placement on the scale.

Till cup dimensions:  
7.3cm W x 9.2cm D x 4.6cm H.
