The Abberton Walkway Canopy Technical Specification

Size:

Length: 1.4m - Unlimited

Projection: 0.9m – 1.5m

Framework:

Main Frame

The Abberton is constructed from UNI 6060 T5 grade aluminium that is polyester powder coated. It has galvanised steel brackets and small (20cm high) wall plates.

Roof Panels:

Roof panels are 4mm solid polycarbonate sheets that are light in weight, have a high impact resistance and a high light transmittance of up to 87%.

Guttering:

Supplied with an integrated aluminium gutter with a drain side and drip spout.

Load Testing:

The canopy has been certified by TÜV for loads up to 170daN/m² and did not record any signs of any permanent damages or breakage.

Weather Resistance:

The aluminium frame's pure thermosetting polyester powder coating ensures high resistance to UV rays. The polycarbonate roof panels offer excellent UV protection on both sides of the sheets which increases the resistance to weathering effects. The panels will not yellow or change colour and they will retain their shine.

Fire Resistance:

The clear (standard) polycarbonate roof panels adhere to the UK fire rating BS 476 Part 7 Class 1Y. All polycarbonate colours (excluding Opal) have passed the European fire rating EN 13501-1 B s2 d0.

The Abberton Wall Mounted Canopy V1.2 LU 180219
