Brings it Together

TFC Europe Ltd offers complete fastening solutions; the single source for all your product and supply chain needs.

From our well established technical fastener base, we can now offer supply chain expertise using the latest industry methods which means that we can provide a truly global supply and distribution service to maximise your business productivity and promote efficient cash flow: from reducing your supplier base, offering product expertise, tailored systems, sophisticated parts selection and fast delivery, TFC brings it together.

Supply Chain Management Made Easy

Our expert teams can assess your needs and provide a single source solution that will not only reduce your supplier base and excessive delivery costs but also provide a simplified answer to your ordering requirements.

TFC are experts in reducing overheads through parts rationalisation. Our exceptional technical expertise and applications knowledge can help you streamline your range of products and advise on material specifications and product suitability for any application, whatever the use.

Our high performance technical products are engineered by some of the world's leading manufacturers to deliver low cost solutions to a multitude of assembly needs throughout industry. Our sophisticated In-house parts selection software reduces picking time, maximising efficiency and reducing costs. All TFC parts are manufactured to internationally recognised standards and released under our own BS/EN/ISO 9002 approval.

Tailored Systems

TFC's logistical expertise is matched by its technical know-how. We can tailor make a system to suit your specific needs, no matter what the fastener, application or quantity.

Kanban

By adopting Kanban systems to improve ordering and supply, TFC makes available to its customers a highly efficient system of tools that offer the benefits of lean and just in time (JIT) manufacturing with Vendor Managed Inventory (VMI).

With TFC as your single source, our efficient Kanban system takes care of all your ordering needs, alleviating a whole variety of hidden administration and transaction costs.

Use up current stock within system.

Once first bin has been used, customer places empty bin on top of rack/back of shelf.

Management information. Review usages.

TFC service driver scans barcode on site, removes empty bin from customer premises. Visual check of all other bins.

Housekeeping if required. Transmit scanned info back to TFC head office. Delivery note automatically produced.

Refill bin at TFC using reserved stock. Renew label if required, quick wipe of bin, load up in location order.

Return trip. Replace replenished bin within the racking and repeat service steps.

Invoice to suit customer requirements.

Delivery note signed. Queries in duplicate book. Queries to be handed to account manager.

Supply Chain Service

Whether you operate a track-line feed, direct-line feed or point of use twin-bin operation we can arrange multi-weekly visits to sites, direct or remote re-ordering to ensure an efficient, continuous and worry free supply of stock.

Delivery and Stock Control

We deliver what you want, when you need it.

We will help optimise your stockholding and storage, making maximum use of your production capabilities and enhancing your cash flow through efficient use of stock and ordering; so you only order stock when you need it.

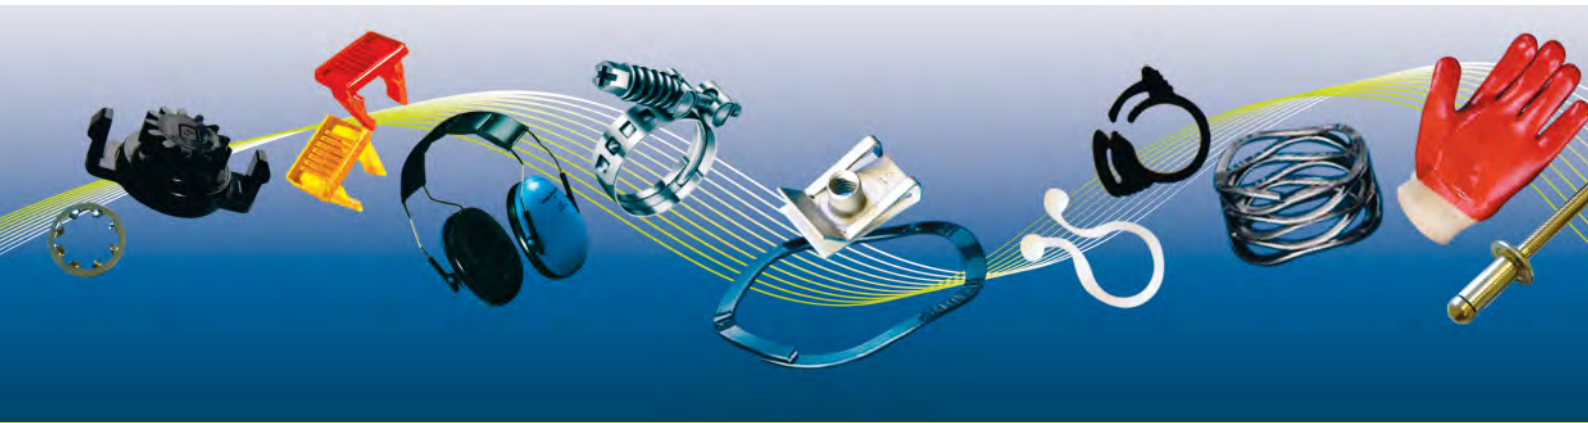

Global Presence

TFC Europe Ltd offer a complete fastening solutions supply and distribution service to manufacturers and industry throughout the UK, Europe and beyond via our global distribution network. With Service Centres based in key strategic locations our logistical capabilities place TFC closer than ever to the main delivery arterial networks.

Our global presence means we can support your product and supply chain needs where ever you are in the world, whatever the size of your company but with the personal relationship of a local supplier.
