

Wicksteed - Naturally

Designed by British mountaineers based upon considerable climbing experience, these dramatic Rockscapes are created on site; saving huge transport costs and logistical issues regarding siting.

Initially sculpted into their base shape – carefully transcribed from a scale model – the form is then reinforced with a steel mesh before being sprayed on site with colour-impregnated concrete to a depth of 150mm. Each climbing face caters for differing abilities.

Recreate a dramatic, stone mountain face with Wicksteed's authentic Rockscapes

Rockscapes are exceptionally realistic and will enhance any natural outdoor environment, creating effective and challenging climbing structures which will appeal to both novices and expert climbers!

Presented here are four Rockscape concepts, but bespoke designs are also available.

**Henge**  
Product code: 603-HENG

Height 1.7m  
Climbing surface 16m<sup>2</sup>  
Footprint 2.8m x 1.1m

**Rockscapes**

**Igneous**  
Product code: 603-IGNE

Height 2.9m  
Climbing surface 32m<sup>2</sup>  
Footprint 3.4m x 1.4m

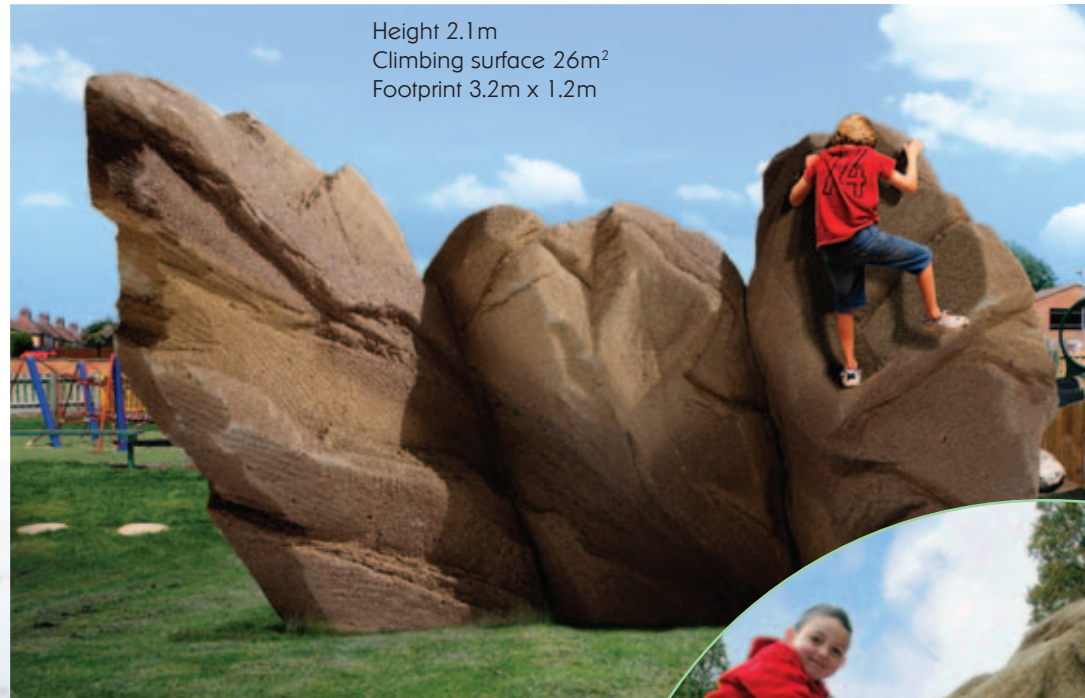

**Ridge**

Product code: 603-RIDG

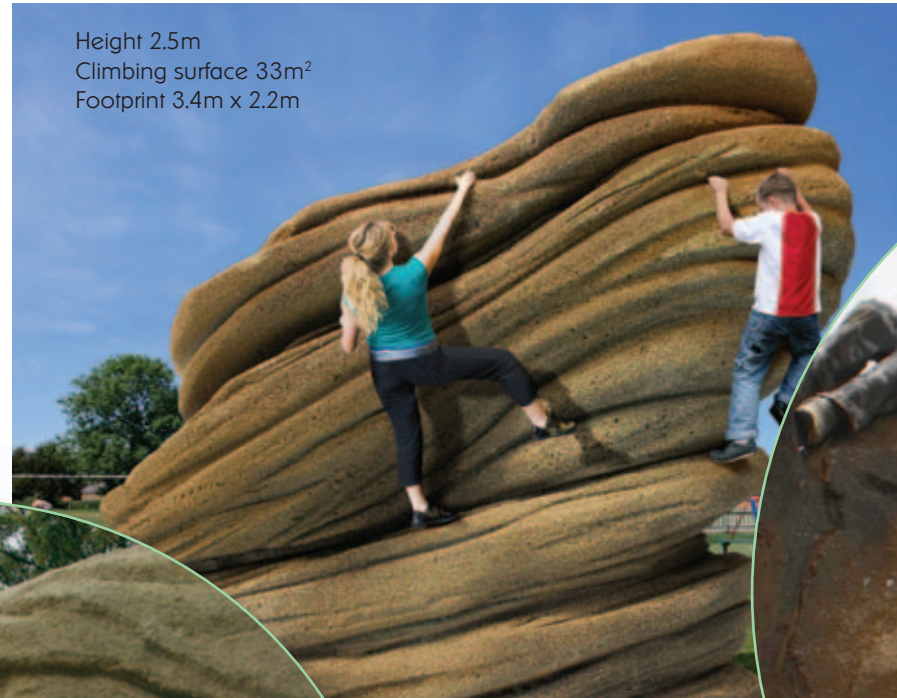

Height 2.1m  
Climbing surface 26m<sup>2</sup>  
Footprint 3.2m x 1.2m

**Gritstone**

Product code: 603-GRIT

Height 2.5m  
Climbing surface 33m<sup>2</sup>  
Footprint 3.4m x 2.2m

Hand carved foot and hand holds and even authentic-looking fossil patterns can also be added during the process to produce incredibly realistic, natural climbing surfaces.

This Spiffire flying out from the clouds is an excellent example of how unique our bespoke Rockscapes can be.

## Rockscapes

There are even smaller ones, too!

Additional Rockscape play features such as scramble nets, rope bridges, etc, can be included at the design stage.
