

The provision of shade and shelter within an outdoor school environment is a high priority and Shade Sails block up to 94% of harmful UV rays whilst providing a significantly cooler place in which to sit or play.

Our popular range of timber-based outdoor classrooms looks attractive and provides a flexible space for outdoor learning. Cost-effective and efficient Shade Pergolas are the ideal way of maximising limited school ground space.

As one customer put it, we can transform your school ground:

"I am writing to thank you for the excellent job you have made of the transformation of our play areas. Your designs were fun and interesting for the children. The shaded Pergola with game top picnic tables is a particular hit in the infant area and the bridge and mock stream are superb in the reception playground."

SHADE & SHELTER

Shamwari Pavilion

With timber roofing and 5 balustrade infill panels as standard, raised timber deck and seating the Shamwari Pavilion makes a fantastically exotic, yet practical, outdoor classroom.

Available in:
