

## Slides

Age range 2 to adult

Wicksteed - *Naturally*

Sliding has always been a favourite pastime for children of all ages and slides are included in many of Wicksteed's multi-play systems. This section is all about stand alone items - giving children that sense of rapid descent they love to experience.

*We also choose to continue marketing our timeless styles of traditional pedestal slides, which are well known and still loved by so many and these can be found in the Heritage section of this product book.*

This photograph of the Cableway shows a rubber sheath covering the chain. Due to vandalism problems, the design has been changed and twist link safety chains have now been substituted.

### Cableway

Product code 6190-006

Designed for older children, the towering Cableway zip wire is an exciting challenge - giving each rider a stimulating and exhilarating cruise through the air.

- Available in 3 lengths – 20m, 25m and 30m
- Galvanised steel posts and top bars
- Galvanised starting ramps with log treads
- Fully enclosed carriage mechanism
- Deceleration buffers at each end
- Adjustable cable tension
- Rubber button seat
- Twist link safety chain

### 20m Steel Cableway

Product code CBW20S

### 25m Steel Cableway

Product code CBW25S

### 30m Steel Cableway

Product code CBW30S

(The Cableway is also available with timber posts – please refer to the Timber section of this product book to see this version.)

The area of impact absorbent surfacing required below Cableways differs depending upon the type of surfacing on which they are being installed. Please request an exact safety surfacing specification for your site

### Embankment Slides

A clever way of converting a pre-existing sloping area or a man-made mound into an exciting play feature – our Embankment Slides are ideal for a bank with a gradient of around 30° and can be straight, wavy, single width or wide enough for two.

Embankment Slides are available in a variety of lengths. We recommend that we carry out a site survey before providing you with a quotation, to ensure the design suits your requirements exactly.

## Slides

### Wide Slide

Product code 901-WIDE

Our Wide Slide has been designed for integrated play. Children with special needs can play with able-bodied friends or be helped by adult carers. The slide is wide enough for a child and helper to slide down together. Play panels can be also be incorporated at the lower level for added play value.

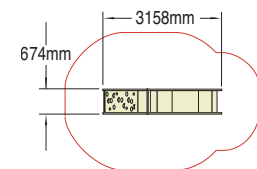

Wet Pour Safety Surfacing  
1.0m FFH: 29m<sup>2</sup> x 40mm

### Cheese Slide

Product code 6050-070

A delightful unit for toddlers to learn to both climb and slide. Access onto the slide is via a ramp with hand and foot holds and it's wide enough to allow two toddlers to slide down together.

Wet Pour Safety Surfacing  
1.0m FFH: 16m<sup>2</sup> x 40mm
