Timber Cableway

The Timber Cableway, or zip wire as it's often called, is an exhilarating experience for the most daring of teenagers. Blending into the natural environment seamlessly, the timber is Radiata Pine which is sourced

from FSC approved sustainable managed forests. This timber is pressure treated - allowing us to guarantee the timber against rotting for 15 years.

20m Timber Cableway

Product code CBW20

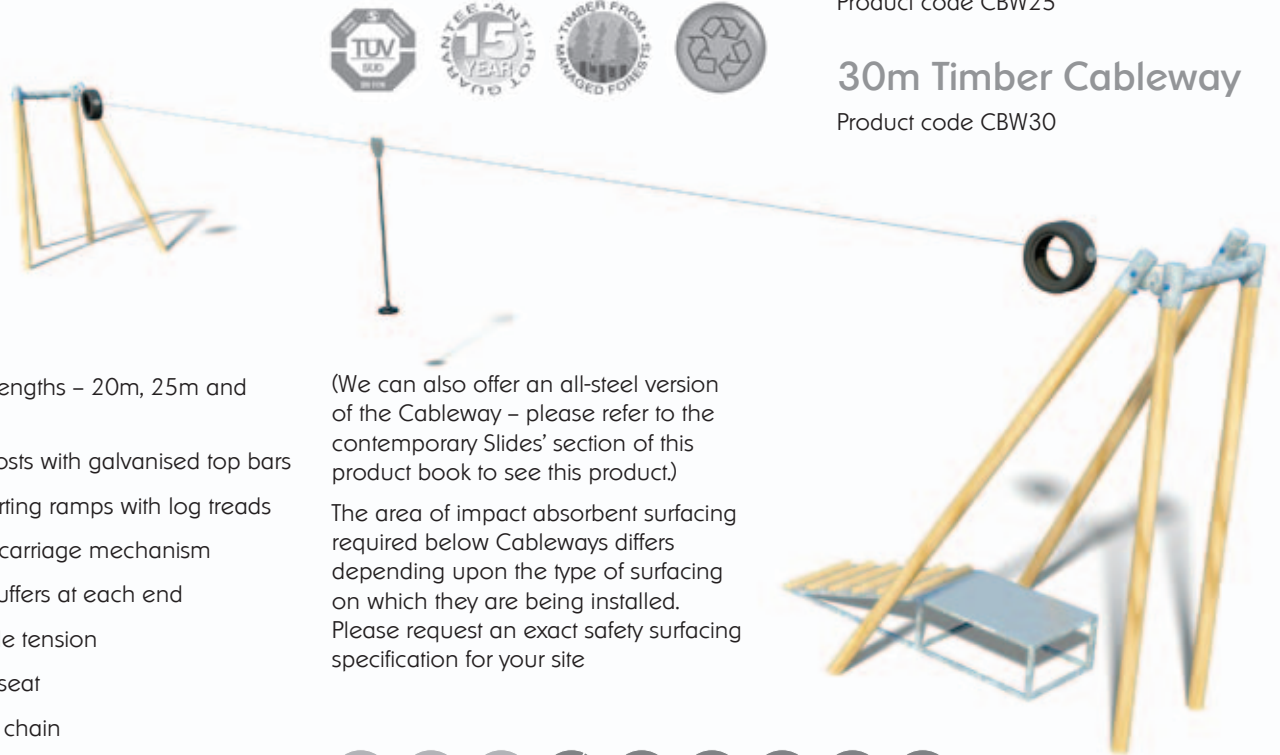

25m Timber Cableway

Product code CBW25

30m Timber Cableway

Product code CBW30

NEW

- Available in 3 lengths – 20m, 25m and 30m
- Radiata pine posts with galvanised top bars
- Galvanised starting ramps with log treads
- Fully enclosed carriage mechanism
- Deceleration buffers at each end
- Adjustable cable tension
- Rubber button seat
- Twist link safety chain

(We can also offer an all-steel version of the Cableway – please refer to the contemporary Slides' section of this product book to see this product.)

The area of impact absorbent surfacing required below Cableways differs depending upon the type of surfacing on which they are being installed. Please request an exact safety surfacing specification for your site

Photographs of the Cableway show a rubber sheath covering the chain. Due to vandalism problems, the design has been changed and twist link safety chains have now been substituted.
